Interface®

Net Effect™ Collection

Seeing the first photographs of Earth from space reframed our relationship with the world and one another forever. It was suddenly clear that the oceans we all share make us unique in the universe.

Inspired by the color and movement of the oceans, our Net Effect collection includes three square styles and three planks. B601, B602 and B603 are a grouping of three textures in 50 cm squares that, when placed side by side, describes the precise moment when the sea foams into the shore. The 25 cm x 1 m planks - B701, B702 and B703 - capture the fluidity of water in linear patterns with expanding and contracting rhythms. The shared palette was drawn from the deepest parts of the ocean to the sun and salt bleached wood and stones of the shore.

All six are made with 100% recycled content nylon, including post-consumer nylon from discarded fishing nets gathered through our Net-Works® partnership. Net-Works provides a source of income for small fishing villages in the Philippines while cleaning up their beaches and waters. The collected nets are sold to Aquafil, who, in turn, converts them into yarn for Interface carpet tile – a very bright (blue) idea for a greener future.

Why Our Modular Flooring?

i2® Modular Carpet

Minimize waste & save money. Interface's i2® styles have mergeable dye lots. That means i2 tiles from different dye lots always blend with tiles of the same color, even when individual tiles are selectively replaced years later. This minimizes the need for attic stock and saves money. And i2 styles that install non directionally generate an average of only 1.5% installation waste as compared to 3-4% for typical modular carpet and an average of 14% for traditional roll carpet.

TacTiles™

No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives. TacTiles are approved for use on GlasBac™, GlasBacRE, CQuest™GB, Graphlar™ and Graphlex™.

Intersept®

Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde. Intersept is standard in Interface carpet tile products backed with GlasBac, GlasBacRE, CQuestGB, ReadyBac™, and CushionBac Renew™.

ReEntry™

Recyclable. Through our ReEntry program, we reclaim all Interface carpet tile. The result? Carpet tile products with up to 85% total recycled content, including as much as 25% post-consumer content.

Sustainability Transparency

Transparency and certified sustainability leadership come standard on Interface products, including published ingredients in HPDs (Health Product Declarations) and published EPDs (Environmental Product Declarations), which are based on full life cycle assessment (LCA). And, Interface carpet products are certified to the NSF 140 Sustainable Carpet Assessment Standard. Additionally, Interface flooring and recommended adhesives are 3rd party certified for low VOC emissions in compliance with California Department of Public Health (CDPH) Standard Method v1.2–2017. Carpet products made in our US facilities are made with 99% renewable energy.

Third Party Certification

The flooring products that we sell, including cartpet tile, are carbon neutral across their full product life cycle through our third party verified Carbon Neutral Floors™ program. To find out more, visit interface.com/carbonneutral

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

PLEASE RECYCLE

Printed on 50% post consumer waste (PCW) fiber manufactured using wind power.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.

Samples

Order samples at interface.com. You'll receive email order confirmations, 24/7 access to order status and more. Not near a computer? You can also request samples by calling one of the numbers below.

InterCircle Sample Return

Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see interface.com/disclaimer.
