Interface®

A tribute to global textiles.

World Woven Collection is a classic – beloved for its hand-woven inspired textures. From Northern Europe's utilitarian wools to Japan's revolutionary Saori weaving and France's elegant bouclés, World Woven pays homage to centuries-old weaving traditions and enduring textile crafts across cultures. Bringing the sense of familiarity, warmth and handcrafted authenticity of these familiar fabrics, World Woven offers you distinctive beauty and a world of options.

The collection includes eight core 25 cm x 1 m planks. Four fundamental textures were inspired by plain, woolen textiles. WW870, WW880 and WW890 share 8 go-to neutrals, resembling undyed wools with subtle contrast. WW860 features a 12-color range, extended and refined for today's interiors.

To complement these four foundational styles are four options introducing more detailed patterning, plushness and sophisticated yet subtle color. WW865 features options with rich accent threads and a flat, orderly construction that contrasts the highly textured, yet soft structure of WW895. French Seams & Stitch in Time bring reserved, yet handsome patterns recalling vintage fashion's herringbones and bouclés.

To add eye-catching design moments or dynamic area rugs, look to FLOR. Three styles were developed as complements to the collection. Collins Cottage and Scottish Sett revive the noble houndstooth and plaid while Mod Café renews the playful patterns of the 1950s.

Together, the broad offering of the World Woven Collection brings definition and detail to your interior. And like all Interface products, the World Woven Collection is third-party verified carbon neutral across the full product life cycle through our Carbon Neutral Floors™ program.

PRODUCT VVW880 COLOR 105364 NATURAL LOOM
PRODUCT FLOR SCOTTISH SETT COLOR NATURAL INSTALLED PATTERN BY TILE

Why Our Modular Flooring?

Modular Flooring
Performance and flexibility.
Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no taping and no rippling effect, yet are easy to selectively replace. Our modular carpet is easier to handle than bulky roll carpet and produces an average of just 3-4% waste compared to roll carpet's average of 14%. And it installs seamlessly with our LVT, no transition strips needed.

TacTiles™
No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives. TacTiles are approved for use on GlasBac™, CQuest™GB, CQuest™Bio and CQuest™BioX.

Intersept®
Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde. Intersept is standard in Interface carpet tile products backed with GlasBac, CQuestGB, ReadyBac™ and CushionBac Renew™.

ReEntry™
Recyclable. Through our ReEntry program we reclaim and recycle our carpet tile and Sound Choice™ LVT. ReEntry is the only third party certified recycling system among North American flooring manufacturers.

Sustainability Transparency
Transparency and certified sustainability leadership come standard on Interface products. We enlist outside partners to help us evaluate the entire product life cycle and reduce the environmental and human health impact of our flooring. And, carpet products made in our US facilities are made with 99% renewable energy.

Help Lower Your Carbon Footprint
Like all the flooring products we sell, Interface carpet tile is carbon neutral across its full product life cycle through our third party verified Carbon Neutral Floors™ program. To find out more, visit interface.com/carbonneutral

FLOR

FLOR by Interface offers lush textures and bold patterns that are anything but business as usual. FLOR carpet tiles are the perfect design accent for offices, conference rooms and high-profile collaborative spaces – as area rugs or wall-to-wall installations. With all the performance benefits of Interface products, including the 15-year commercial warranty, they'll get the job done for years to come.

InterCircle Sample Return

Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see interface.com/disclaimer.

Environmental Product Declaration (EPD) –
A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Health Product Declaration (HPD) –
A transparency tool for evaluating whether a product supports Green Chemistry. As part of our work on Health and Materials, Interface continuously reduces the environmental and health impacts of our products through elimination of materials of concern.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

NSF 140 Sustainable Carpet Assessment –
The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire life cycle.
