

# cGMP DRAIN FINISHING

## Performance Benefits:

- No Thermal Shock
- Hygienic flooring system
- Chemical and stain resistant
- Resistance to cleaning and disinfecting agents (Steris tested)
- Simple maintenance and repair protocols to minimize downtime
- Coordinating cold welds to meet space specific needs

## Sustainability Benefits:

- Contributes to better indoor air quality with products that are GREENGUARD Gold certified

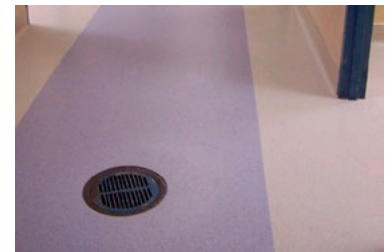

## Technical Department:

- For applications not covered in this document, contact the technical department: Email [nta@nora.com](mailto:nta@nora.com); Use subject line "Industry"

nora® by Interface® is a global leader in the design and production of high-performance rubber flooring solutions. We can help you match performance characteristics to every square foot of your facility.

Our vulcanized rubber flooring system provides a comprehensive solution within a washroom/COP CIP space due to the harsh wet environment associated with these spaces.

- Recommend using polyurea - Adhesives Technology Crackbond JF-82-Fast, or similar - for sealing around drains in wet environments such as washrooms
- nora® cold weld options available for standard drains. Contact your nora Sales Representative for recommendations
- Concrete must be cut  $\frac{3}{4}$  inch deep and  $\frac{1}{2}$  inch wide around the perimeter of the drain
