Christa McAuliffe Elementary School

Concord, NH

"Rubber flooring was the ideal fit for our goal of creating collaborative and flexible learning spaces."

Matt Cashman, Director of Facilities & Planning,
Concord School District

Christa McAuliffe Elementary School, in Concord, NH, is one of three visionary elementary schools debuted by Concord School District. The new school consolidates six aging buildings and has propelled Concord's early education facilities into the future with collaborative, multi-purpose, open spaces that support individualized learning. Administrators selected norament® grano to cover the facility, which can accommodate about 480 students. "The school re-imagines and successfully demonstrates what the future of elementary learning will be," says Matt Cashman, director of facilities & planning. "A variety of spaces promote hands-on exploration and group interaction. Throughout the facility, the floor's durability, comfort, sound absorption and chemical-free maintenance has been transformative for our staff and students."
