Mission Zero®

our promise to eliminate any negative impact our company may have on the environment by the year 2020.

Interface®

Aerial™ Collection | Neighborhood™ Blocks & Neighborhood Smooth

Imagine a neighborhood that goes on for blocks and blocks with winding, tree lined streets connecting people to people and people to parks. It's a neighborhood with a strong sense of community and pride in the colorful characters who keep it lively and relevant. That's what we envisioned when we landed here: Aerial Collection | Neighborhood.

We selected six colors from the strong, neutral palette of the Aerial Collection, and then added six totally new, vibrant colors, taking it to new heights. Neighborhood Blocks draws a pattern in rectilinear lines while Neighborhood Smooth softens to more curvilinear forms. Both constructions are offered in all 12 colorways in our Skinny Planks™ format. You'll find paths to connect each of these new styles with one another or mix in any of Aerial's other styles—AE310, AE311, AE312 or AE313—to create a combination uniquely your own.

Like all the styles in the Aerial Collection, Neighborhood Blocks and Neighborhood Smooth are part of our i2® product family with benefits like mergeable dye lots, which allows various lots to be blended into a single installation, beautifully. This reduces the need for attic stock and makes replacement easy.

Stop by our neighborhood today and have a look around. We think you'll find yourself returning to it again and again.

(COVER) **PRODUCT** NEIGHBORHOOD SMOOTH **COLOR** 105631 FOG/SMOOTH
PRODUCT NEIGHBORHOOD BLOCKS **COLORS** 105621 CARIBBEAN/BLOCKS,
105622 GREENERY/BLOCKS, 105620 INDIGO/BLOCKS **INSTALLED** PATTERN BY TILE

Specifications **i2**

Modular, 25cm x 1m	163250AK00
Backing System	GlasBac® Tile
Yarn Manufacturer	Aquafil
Yarn System	100% Recycled Content Type 6 Nylon
Color System	100% Solution Dyed
Construction	Tufted Textured Loop
Preservative Protection	Intersept®
Soil/Stain Protection	Protekt2®
Pile Thickness	0.088 in., 2.2 mm
Pile Density	6,545
Total Recycled Content	71%
Indoor Air Quality	CRI Green Label Plus #GLP0820

Why Our Modular Carpet?

Modular Carpet Tile

Performance and Flexibility. Interface's modular carpet tile sets the industry standard for performance. Tiles are designed to stay on the floor with no upcurl, tapping or rippling. Our square and plank tiles are easier to handle, install and maintain. They install with just 3-4% waste – and as little as 1.5% for i2® non directional styles – compared to an average 14% for traditional roll carpet. And our i2 styles are mergeable so tiles from multiple dye lots will always blend, even when selectively replaced years later.

Intersept®

Mold Protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria — guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

Cool Floor™

The Low Carbon Option. Help stop climate change. ALL Interface modular flooring sold in North America is third party verified climate neutral Cool Floor. We start by using low-carbon materials and manufacturing processes, then Cool Floor zeros out all remaining greenhouse gas (GHG) emissions associated with the entire life cycle of your flooring, from raw material extraction through use and recycling.

ReEntry®

Recyclable is Now a Reality. Through our ReEntry program and partnerships with our fiber suppliers and recycling centers throughout North America, separated Type 6 and 6,6 nylon are recycled into new 6 and 6,6 nylon, while separated GlasBac®RE and similar competitor backings are recycled into GlasBac® non-virgin PVC backing using our Cool Blue™ technology. The result? Products with up to 89% total recycled content, including as much as 27% post-consumer content.

TacTiles®

No Glue Installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

Sustainable Choice

Environmental Responsibility. Interface was the industry's first to publish an EPD (Environmental Product Declaration), which evaluates consistent factors based on full lifecycle assessment (LCA). We now have published EPDs for 99% of our products globally.

In addition, all Interface products with GlasBacRE backing meet the Platinum level of the NSF/ANSI 140 Sustainable Assessment for Carpet. GlasBac or NexStep® backed products meet the Gold level. All may contribute toward a USGBC or CaGBC LEED Innovation Credit.

Third Party Certification

cool floor™

Cool Floor – Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your flooring.

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.
