

A modern interior space featuring a wide staircase with a black metal railing. The floor is covered in a patterned carpet with shades of green, blue, and orange. Large windows in the background offer a view of a lush green landscape. Sunlight streams in from a skylight at the top, creating a bright, airy atmosphere.

Interface®

Aerial™ Flying Colors

POW! The Aerial™ Collection just got a boost of color. Pure color tiles connect to "color-full" tiles; colorful tiles connect to transition tiles; and transition tiles connect to the strong, neutral foundation that skyrocketed Aerial from the start.

Aerial Squares and Aerial Neighborhood™ are now joined by Aerial Flying Colors, creating a library of 79 tiles in a full range of vibrant and neutral colors in squares and planks.

Aerial Flying Colors adds two new plank styles, AE317 and AE315, and more colors in AE311. Plus, coordinating style On Line™ is expanded to offer solid companions in each Aerial Flying Colors colorway. Use AE315 to blend a spray of color to a neutral ground, creating that signature Interface transition tile, or cast a soft hue across the entire floor plane. Use AE317 to make a bold leap with a vibrant, mixed-hue approach to each colorway.

There are thirteen color sequences presented with an On Line bright at the top and a neutral at the bottom to accent, define and set color direction. But don't just look up and down—look left and right across the full array to find your own unique combination.

No stranger to innovation, Interface produces carpet tiles with the lowest carbon footprint in the commercial flooring industry—before any offsets. And, the entire Aerial Collection is made with 100% recycled content nylon. You'll also find i2™ styles with benefits like mergeable dye lots that enhance selective replacement.

Interface Design Studio

Designer to Designer

Whether you're just getting started with a design project or you're looking for support in the home stretch, the Interface Design Studio is here to help. Our team of trained designers has a wealth of experience and a deep knowledge of our products, saving you time by focusing on the foundation of every design project - the floor.

Color That Moves You

Looking for inspiration? Do you need help creating a floorplan with the transitions of Aerial Flying Colors? Interface Design Studio is equipped to do anything you need, from designing an entire floorplan to developing custom colors or even original cuts and custom designs. Let Interface Design Studio help you create a moving color story with Aerial Flying Colors.

Use our digital floor design tool to see these products in your own space or in one of our pre-selected rooms.

Interface.com/floordesign

Why Our Modular Flooring?

i2® Modular Carpet
Minimize waste & save money. Interface's i2® styles have mergeable dye lots. That means i2 tiles from different dye lots always blend with tiles of the same color, even when individual tiles are selectively replaced years later. This minimizes the need for attic stock and saves money. And i2 styles that install non directionally generate an average of only 1.5% installation waste as compared to 3-4% for typical modular carpet and an average of 14% for traditional roll carpet.

TacTiles™
No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives. TacTiles are approved for use on GlasBac™, CQuest™GB, CQuest™Bio and CQuest™BioX.

Intersept®
Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde. Intersept is standard in Interface carpet tile products backed with GlasBac, CQuestGB, ReadyBac™ and CushionBac Renew™.

Environmental Product Declaration (EPD)
A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Health Product Declaration (HPD)
A transparency tool for evaluating whether a product supports Green Chemistry. As part of our work on Health and Materials, Interface continuously reduces the environmental and health impacts of our products through elimination of materials of concern.

CRI Green Label Plus
An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

NSF 140 Sustainable Carpet Assessment
The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire life cycle.

ReEntry™
Recyclable. Through our ReEntry program we reclaim and recycle our carpet tile and Sound Choice™ LVT. ReEntry is the only third party certified recycling system among North American flooring manufacturers.

Sustainability Transparency
Transparency and certified sustainability leadership come standard on Interface products. We enlist outside partners to help us evaluate the entire product life cycle and reduce the environmental and human health impact of our flooring. And, carpet products made in our US facilities are made with 99% renewable energy.

InterCircle Sample Return

Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see interface.com/disclaimer.
