Global Change Collection Progression

CIM # IFS 03/2017

mission Ø

Mission Zero®
our promise to eliminate any
negative impact our company
may have on the environment
by the year 2020.

Interface®

The variation of nature within the modular framework
Nature offers constantly changing surroundings and stimulates us in different ways. Built spaces can offer the same kind of variety, providing environments matched to the activities taking place.

Global Change extends our library with new colors, patterns and textures – disparate elements that combine to create a cohesive whole. A classic Interface offering, pairing nature-inspired design with the structure of a modular system.

This collection is a new expression of biophilic design, offering a varied sensory experience with wide-ranging colours, patterns, textures, formats and materials. This global collection comprises seven carpet tile ranges in both Squares and Skinny Planks, ranging from organic to crisp designs. Four draw inspiration from familiar organic patterns: Glazing and Shading recreate the shadows of a forest canopy on the floor, Ground and Raku reference different terrains. Progression I, II and II provide the connective tissue that binds one idea to another, seamlessly.
Global Change is available around the world and manufactured in Asia, North America, Australia and Europe.

Specifications

Modular, 25cm x 1m	142660AK00
Backing System	GlasBac® Tile
Yarn Manufacturer	Universal
Yarn System	Post-Consumer Content Type 6,6 Nylon
Color System	100% Solution Dyed
Construction	Tufted Sheared
Lifetime Antimicrobial	Intersept®
Soil/Stain Protection	Protekt²®
Pile Thickness	0.128 in 3.3 mm
Pile Density	8,719
Total Recycled Content	26-66%
Indoor Air Quality	CRI Green Label Plus #GLP0820

Why Our Modular Carpet?

Modular Carpet Tile
Performance and Flexibility. Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is also easier to handle, install and maintain than bulky roll carpet. And, it installs with less waste so you save time and money — 3-4% for typical modular carpet compared to an average waste factor of 14% for traditional roll carpet.

Samples
Order samples at www.interface.com. You'll receive email order confirmations, 24/7 access to order status and more. Not near a computer? You can also request samples by calling one of the numbers below.

Cool Carpet™
The Low Carbon Option
Help stop climate change. ALL Interface modular carpet sold in North America is third party verified carbon neutral Cool Carpet. We start by using low-carbon materials and manufacturing processes, then Cool Carpet zeros out all remaining greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet, from raw material extraction through use and recycling. And carbon neutral Cool Carpet may be eligible for a USGBC or CaGBC LEED Innovation Credit.

TacTiles®
No Glue Installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

InterCircle™ Sample Return
Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

Third Party Certification

cool carpet™

Cool Carpet – Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.
