

# Global Change Collection

**Interface®**

### **The variation of nature within the modular framework**

Nature offers constantly changing surroundings and stimulates us in different ways. Built spaces can offer the same kind of variety, providing environments matched to the activities taking place.

Global Change extends our library with new colors, patterns and textures—disparate elements that combine to create a cohesive whole. A classic Interface offering, pairing nature-inspired design with the structure of a modular system.

This collection is a new expression of biophilic design, offering a varied sensory experience with wide-ranging colors, patterns, textures, formats and materials. This global collection comprises seven carpet tile ranges in both squares and Skinny Planks™, ranging from organic to crisp designs. Four draw inspiration from familiar organic patterns: Glazing™ and Shading™ recreate the shadows of a forest canopy on the floor, Ground™ and Raku™ reference different terrains. Progression™ I, II and III provide the connective tissue that binds one idea to another, seamlessly.

Global Change is available around the world and manufactured in Asia, North America, Australia and Europe.

## Why Our Modular Carpet?

### Modular Carpet Tile

*Performance and Flexibility.* Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is also easier to handle, install and maintain than bulky roll carpet. And, it installs with less waste so you save time and money—3-4% for typical modular carpet compared to an average waste factor of 14% for traditional roll carpet.

### Cool Carpet™

*The Low Carbon Option.* Help stop climate change. ALL Interface modular carpet sold in North America is third party verified climate neutral Cool Carpet. We start by using low-carbon materials and manufacturing processes, then Cool Carpet zeros out all remaining greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet, from raw material extraction through use and recycling.

### TacTiles®

*No Glue Installation.* Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

### Samples

Order samples at [www.interface.com](http://www.interface.com). You'll receive email order confirmations, 24/7 access to order status and more. Not near a computer? You can also request samples by calling one of the numbers below.

United States	Canada

- Sign up to get the latest information on Interface products and news

### InterCircle™ Sample Return

Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

## Third Party Certification

### cool carpet™

**Cool Carpet** – Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

**Environmental Product Declaration (EPD)** – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

**Sustainable Assessment for Carpet** – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

**CRI Green Label Plus** – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

### **Intersept®**

*Mold Protection.* Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

### **ReEntry®**

*Recyclable is Now a Reality.* Through our ReEntry program and partnerships with our fiber suppliers and recycling centers throughout North America, separated Type 6 and 6,6 nylon are recycled into new 6 and 6,6 nylon, while separated GlasBac® and similar competitor backings are recycled into GlasBacRE non-virgin PVC backing using our Cool Blue™ technology. The result? Products with up to 81% total recycled content, including as much as 35% post-consumer content.

### **Sustainable Choice**

*Environmental Responsibility.* Many Interface products carry the GreenCircle Certified Environmental Facts label, which has verified that standard Interface products offer a minimum of 66% and 80% total recycled content when backed with GlasBac® and GlasBacRE backing respectively, using 99% renewable energy.

Transparency and certified sustainability leadership come standard on all Interface products, including published ingredients in HPDs (Health Product Declarations) or Declare Labels. In addition, more than 99% of our products globally have a published EPD (Environmental Product Declaration), which evaluates consistent factors based on full life cycle assessment (LCA). And, all Interface products with GlasBacRE backing are certified to the Platinum level of the NSF/ANSI 140 Sustainable Assessment for Carpet. GlasBac backed products meet the Gold level. NSF/ANSI 140 certified products contribute toward a USGBC or CaGBC LEED credit.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see [www.interface.com/disclaimer](http://www.interface.com/disclaimer).

Printed on 50% post consumer waste (PCW) fiber manufactured using wind power.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.
