Honor Roll

Our four Honor Roll styles are high achievers with top marks in performance and sustainability. We've gathered three 50cm squares, Exposed™, Profile™ and Cubic™, and added new colors to help them pair with Verticals™, one of our Skinny Planks™.

Each one is part of our i2® product family, designed to eliminate any concerns with blending different dye lots or selective replacement.

Exposed offers a modeled look that captures the cool factor of stained concrete, but with softness and acoustical benefits that concrete can't match.

Cubic is the teacher's pet, a favorite for many years because of its proven performance and classic geometric pattern.

Verticals puts a new spin on this familiar geometry with its 25cm x 1m Skinny Planks format, introducing a number of design possibilities.

Profile's more subdued, yet non directional pattern makes it the perfect companion.

And like all our products around the world, these styles are carbon neutral . . . just a few of the steps we've taken on our path toward creating a climate fit for life. Join the **#ClimateTakeBack** movement.

PRODUCT CÚBIC COLOR 106077 PEAK, INSTALLED NON DIRECTIONAL

PRODUCT VERTICALS COLOR 103736 PINNACLE INSTALLED ASHLAR
PRODUCT ON LINE™ COLOR 103793 INDIGO INSTALLED PATTERN BY TILE

Why Interface? | Performance

Beauty That Lasts

Fiber We start with the best—commercial-grade, solution dyed fibers with a low modification ratio (MR). A lower MR means better performance. The result? High performance fibers that don't fade or bleach out.

Interface
Premium Branded,
Type 6 or 6,6

Competitor
Mill Extruded,
Type 6

Modification Ratio = x/y

Passing the Test

Industry standard wear tests just aren't tough enough. So, we developed our own—the **Appearance Retention Test (ART)**. ART considers real-world conditions—wear, soiling and maintenance—for up to 20-year increments. If an Interface style doesn't pass, we won't launch it.

Breathe Easier

interface.com/intersept

Intersept® Only Interface carpet tiles feature Intersept, our safe and effective preservative that protects against odor-causing micro-organisms. It's built into the backing system, so it won't wear off or wash away.

Maintenance Made Easy

interface.com/maintenance

Simple vacuuming, spot cleaning and routine deep cleaning are all you need—no special equipment or cleaning solutions.

Inspired by Nature

interface.com/i2

i2® Nature doesn't design with perfectly matched materials, so why should we? Our i2 products are made to blend, not match. That means no dye lot concerns, so you order what you need when you need it. Bonus: Many i2 styles install with as little as 1.5% waste.

Glue-free Installation

interface.com/tactiles

TacTiles® Just peel, pull and stick for a hassle-free, durable installation. No mess, no drying time and little, if any, future floor prep. And TacTiles connectors can be recycled with Interface carpet tiles.

We Back It Up

interface.com/warranty

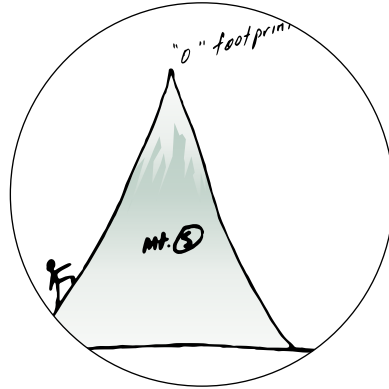

All Interface carpet tiles come with our standard **15-year warranty**. No ifs, ands or buts.

Why Interface? | Sustainability Leadership

Where We Are

interface.com/missionzero

Mission Zero® From the beginning, we understood that sustainability had to be addressed with a “whole company” approach. We established our Mission Zero promise to eliminate any negative impact the company has on the environment by 2020, and we’re well on our way to achieving it. See our progress at interface.com/missionzero.

Zero Carbon

interface.com/carbonneutral

Carbon Neutral Floors™ Interface is the first global flooring manufacturer to declare that ALL products globally are third party verified carbon neutral throughout their entire life cycle. That means we zero out all greenhouse gas emissions (GHGs) associated with our carpet tile and LVT from creation to end-of-life, resulting in the lowest carbon footprint in the industry.

We’re not adding excess carbon to the atmosphere, and when you buy from us, neither are you.

Closing the Loop

interface.com/reentry

ReEntry® We want our carpet tile and LVT back. Through our ReEntry program we reclaim and recycle our used carpet tile and LVT and turn it into new flooring. We’ll even take many of our competitors’ products.

Where We Are Going

interface.com/climatetakeback

Climate Take Back™ With Mission Zero in sight, we're taking things a step further. We've changed our company. It's time to change the world. Climate Take Back is our bold new mission to reverse global warming. Bold statement? Maybe, but see how we back it up: interface.com/climatetakeback.

Climate change is undeniable. And reversible. Our mission is to prove it. **Join the #ClimateTakeBack and help create a climate fit for life.**

Rethinking the Supply Chain

interface.com/net-works

Net-Works® Our Net-Works® partnership is an innovative approach to a circular economy. Fishermen in the Philippines and Cameroon collect waste nets and sell them to the fiber manufacturer, Aquafil, for use in their 100% recycled content nylon. We use that nylon to offer you high performance carpet tiles with up to 90% total recycled content. Everybody wins.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see www.interface.com/disclaimer.

Printed on 50% post consumer waste (PCW) fiber manufactured using wind power.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.
