

A modern interior space featuring a large, patterned carpet in shades of beige and grey. The room has exposed brick walls, a large window with a black frame, and a white built-in bench. A black spiral staircase is visible in the background. A black metal table with high chairs is on the right. A single pendant light hangs on the left.

Naturally Weathered

Interface®

Naturally Weathered™

Traditional clapboard and shingles made from cedar or white oak are intentionally left unfinished and exposed to the elements so they'll transform over time into some lovely and familiar version of warm grey. Not worn out, but well worn. A look that carries with it a sense of history and even pedigree.

Naturally Weathered brings that time-worn palette inside with 8 highly variegated neutrals that explore every aspect of the color grey in our appropriately proportioned Skinny Planks™ format. So each installation of Naturally Weathered will cover the floor in an entirely unique composition of pattern and color.

Naturally Weathered is made with 100% recycled content nylon and is part of our i2® product family, designed to eliminate any concerns with blending different dye lots or selective replacement. And like all of our products around the world, it is carbon neutral ... just a few of the steps we take on our path toward creating a climate fit for life. Join the **#climatetakeback** movement.

106026 HARBOR GREY

Why Our Modular Flooring?

i2® Modular Flooring

Minimize waste & save money. Interface's i2 styles have mergeable dye lots. That means i2 tiles from different dye lots always blend with tiles of the same color, even when individual tiles are selectively replaced years later. This minimizes the need for attic stock and saves money. And i2 styles that install non directionally generate an average of only 1.5% installation waste as compared to 3-4% for typical modular carpet and an average of 14% for traditional roll carpet.

Carbon Neutral Floors™

Create a climate fit for life. All Interface flooring sold globally is third party verified carbon neutral. We've taken a holistic approach to achieve carbon neutrality, first through reducing the carbon footprint of our products and then using carbon offsets for the remainder, including the emissions from raw materials, our manufacturing processes and product use to end of life.

TacTiles®

No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

Intersept®

Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

ReEntry®

Recyclable is now a reality. Through our ReEntry program and partnerships with our fiber suppliers and recycling centers throughout North America, separated Type 6 and 6,6 nylon are recycled into new 6 and 6,6 nylon while separated GlasBac®, GlasBacRE and similar competitor backings are recycled into new GlasBacRE non-virgin PVC backing using our Cool Blue™ technology. The result? Products with up to 89% total recycled content, including as much as 27% post-consumer content.

Sustainable Choice

Environmental responsibility. More than 95% of Interface products manufactured in the Americas carry the GreenCircle Certified Environmental Facts label, which has verified that standard Interface products are manufactured using 99% renewable energy and offer a minimum of 66% and 80% total recycled content when backed with GlasBac and GlasBacRE backing respectively. All Interface products include published HPDs (Health Product Declarations) or Declare Labels and more than 99% have a published EPD (Environmental Product Declaration) globally, and all products produced in the Americas are NSF/ANSI 140 gold or platinum certified.

Third Party Certification

Bureau Veritas – All Interface flooring sold globally is third party verified carbon neutral.

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.
