INSTALLATION: Pattern by Tile

D.Y.F.™ DESIGN YOUR FLOOR!

DIVE DEEPER INTO NET EFFECT WITH YOUR OWN MIX OF COLOR, PATTERN AND SIZE.

Each colorway uses two or three colors in its construction. Work with your rep to find the perfect combination of shades for your design. The key below demonstrates how these particular colors appear in a final design. Colors A and B form the base color while the lightest color in position C creates the accent.

B701™
A tufted sheared skinny plank, B701 yields beautiful depth and dimension.

B601™
The plushest of the three squares, B601 feels rich and luxurious underfoot.

B702™
The loop construction of B702 emphasizes the linearity and formality of this plank.

B602™
Make a fluid transition with B602.

B703™
B703's softer appeal comes from its sheared construction.

B603™
Stand firm on B603 with its dense composition.

HOW DO WE MAKE OUR COMPANY A RESTORATIVE ENTERPRISE?

We strive to develop innovative processes and partnerships that put back more than we take from the earth – like our Net-Works™ program. A collaboration between Interface, the Zoological Society of London (ZSL), Project Seahorse and Aquafil, Net-Works provides a source of income for small fishing villages while ridding their beaches and waters of discarded fishing nets. The nets are incorporated into our 100% recycled content type 6 nylon from Aquafil. An elegant design solution for the floor and a socially responsible design solution for a fragile economy – that's a very positive Net Effect.

WHY MODULAR CARPET TILE?

Flexibility

Keep Your Floor Beautiful. Modular carpet tile allows you to play with pattern and design without having to special order carpet sizes. And the same flexibility that lets you create your floor helps you keep it looking good because in-house staff can easily replace individual tiles that become damaged or heavily soiled—no down time or outside contractors required.

TacTiles®

No Glue Installation. Installation or reconfiguration with our glue-free TacTiles installation system means there's no glue smell and no drying time. Guests can use the room as soon as the last piece is laid and all they'll notice is a beautiful floor.

Intersept®

Mold Protection. No matter what's spilled on the floor, our proprietary preservative, Intersept®, protects our modular carpet against the growth of odor-causing bacteria—guaranteed. With proper maintenance Intersept treated carpet safely and effectively inhibits the growth of mold and other bacteria so your floors are always fresh.

Sustainable Choice

Environmental Responsibility. Interface was the industry's first to earn an EPD (Environmental Product Declaration), which evaluates consistent factors based on full lifecycle assessment (LCA). In addition, all of our products with GlasBac®, GlasBacRE and NexStep® backings meet NSF/ANSI 140 Sustainable Carpet Assessment Standard (SCAS).

Less Waste

Save Money. Interface Hospitality's modular carpet tiles install with just 3-4% waste - and as little as 1.5% for i2® non directional styles - compared to an average 14% for traditional roll carpet. And our i2 styles are mergeable so tiles from multiple dye lots will always blend, even when selectively replaced years later.

*Looking for additional comfort under foot?
Ask about our InterComfort™ carpet underlayment.*

Cool Carpet™
Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

Sustainable Carpet Assessment Standard (SCAS)
The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus
An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Environmental Product Declaration (EPD)
A statement of product ingredients and environmental impacts over the entire lifecycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and the LCA must be third party verified.
