
There's something electric about a night on the town. Street lights shine. Buildings buzz. Headlights illuminate the shadows. With the same energetic playfulness, the Night Lights Collection bursts with color and movement. Six unique products featuring neutral tone-on-tone bases and coordinating accent colors deliver nearly endless combinations perfect for any space.

Translucent™ features a simple, linear texture. Available in two cool and two warm grays, it's a versatile foundation on which the rest of Night Lights builds. Glisten™, Soft Glow™ and Reflectors™ evoke energy and dimensionality. Diagonals converge into star, cross-hatch and larger-scale geometric patterns. Like fragments of light dispersing into the night, these textures incorporate more playful uses of color. Luminescent™ and Aglow™ take a much bolder approach. Saturated color accents are reflected within both geometric and linear streaks, adding impact to any space.

With such a versatile collection, there's no limit to how many ways you can mix and match patterns and colors. Plus, Night Lights was designed to easily coordinate with our entire portfolio of LVT and carpet products for even greater design flexibility.

Like all Interface products, the Night Lights Collection is carbon neutral across the full product life cycle through our third-party verified Carbon Neutral Floors™ program. Let your space shine with Night Lights Collection.

PRODUCT AGLOW COLOR 10725 IRON GRASS
PRODUCT REFLECTORS COLOR 107275 IRON GRASS INSTALLED PATTERN BY TILE
Translucent™ Colorline

107226 INK
107227 IRON
107228 NICKEL
107229 TITANIUM

Specifications

- Module: 25cm x 1m
- Yarn Manufacturer: Aquafil
- Yarn System: 100% Recycled Content Nylon
- Color System: 100% Solution Dyed
- Construction: Tufted Pattern Loop
- Preservative Protection: Intersept®
- Soil/Stain Protection: Intersept®
- Pile Thickness: 0.06 in., 1.5 mm
- Pile Density: 10,800
- Total Recycled Content: Up To 65%
- Indoor Air Quality: CRI Green Label Plus #6LP0180, CDPH 01350

Why Our Modular Flooring?

Modular Flooring
Performance and flexibility. Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is easier to handle than bulky roll carpet and produces an average of just 3-4% waste compared to roll carpet's average of 14%. And it installs seamlessly with our LVT, no transition strips needed.

TacTiles®
No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives. TacTiles are approved for use on GlasBac, CQuest®GB, Graphlar™ and Graphlex™.

Intersept®
Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde. Intersept is standard in Interface carpet tile products backed with GlasBac, CQuest®GB, ReadyBac®, and CushionBac® Renew™.

ReEntry®
Recyclable. Through our ReEntry program, we reclaim all Interface carpet tile. The result? Carpet tile products with up to 85% total recycled content, including as much as 25% post-consumer content.

Sustainability Transparency
Transparency and certified sustainability leadership come standard on Interface products, including published ingredients in HPDs (Health Product Declarations) and published EPDs (Environmental Product Declarations), which are based on full life cycle assessment (LCA). And, Interface carpet products are certified to the NSF 140 Sustainable Carpet Assessment Standard. Additionally, Interface flooring and recommended adhesives are 3rd party certified for low VOC emissions in compliance with California Department of Public Health (CDPH) Standard Method v1.2–2017. Carpet products made in our US facilities are made with 99% renewable energy.

Third Party Verification
The flooring products that we sell, including carpet tile, are carbon neutral across their full product life cycle through our third party verified Carbon Neutral Floors® program. To find out more, visit interface.com/carbonneutral

InterCircle Sample Return
Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the products described herein, including recycled content and product warranty information, please see interface.com/disclaimer.

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire life cycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Recyclable. Through our ReEntry program, we reclaim all Interface carpet tile. The result? Carpet tile products with up to 85% total recycled content, including as much as 25% post-consumer content.
