Palindrome  
& Alliteration

**Interface®**

Palindrome™ & Alliteration™

Don't let the names fool you. These two slightly textured companions sound like a mouthful but they're really quite straightforward. Palindrome's steady rhythm of broken striations creates a fluid, tonal visual that's the same coming or going. But Alliteration, as the name implies, playfully inserts staccato touches of color to catch the eye and pick up the beat.

Put them together, use them alone or spice up their earthy colorways with solids from Monochrome™. Feel free to experiment.

Why Our Modular Flooring?

**Modular Flooring**  
*Performance and flexibility.* Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is easier to handle than bulky roll carpet and produces an average of just 3-4% waste compared to roll carpet's average of 14%. And it installs seamlessly with our LVT, no transition strips needed.

**Carbon Neutral Floors™**  
*Create a climate fit for life.* All Interface flooring sold globally is third party verified carbon neutral. We've taken a holistic approach to achieve carbon neutrality, first through reducing the carbon footprint of our products and then using carbon offsets for the remainder, including the emissions from raw materials, our manufacturing processes and product use to end of life.

**TacTiles®**  
*No glue installation.* Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

**Intersept®**  
*Mold protection.* Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

**ReEntry®**  
*Recyclable is now a reality.* Through our ReEntry program and partnerships with our fiber suppliers and recycling centers throughout North America, separated Type 6 and 6,6 nylon are recycled into new 6 and 6,6 nylon while separated GlasBac®, GlasBacRE and similar competitor backings are recycled into new GlasBacRE non-virgin PVC backing using our Cool Blue™ technology. The result? Products with up to 89% total recycled content, including as much as 27% post-consumer content.

**Sustainable Choice**  
*Environmental responsibility.* More than 95% of Interface products manufactured in the Americas carry the GreenCircle Certified Environmental Facts label, which has verified that standard Interface products are manufactured using 99% renewable energy and offer a minimum of 66% and 80% total recycled content when backed with GlasBac and GlasBacRE backing respectively.

**Samples**  
Order samples at [www.interface.com](http://www.interface.com). You'll receive email order confirmations, 24/7 access to order status and more. Not near a computer? You can also request samples by calling one of the numbers below.

**InterCircle™ Sample Return**  
Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

Third Party Certification

**Bureau Veritas** – All Interface flooring sold globally is third party verified carbon neutral.

**Environmental Product Declaration (EPD)** – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

**Sustainable Assessment for Carpet** – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

**CRI Green Label Plus** – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see [www.interface.com/disclaimer](http://www.interface.com/disclaimer).

Printed on 50% post consumer waste (PCW) fiber manufactured using wind power.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.
