Studio Set™

Every project is an opportunity for fresh ideas. Enter Studio Set. Thirteen hues selected to serve as your go-to source for colour in LVT. Studio Set is a spectrum of colours from super-saturated brights to ideal neutrals. Take note of the very subtle woodgrain pattern, but don't get stuck in conventional solutions. These Skinny Planks™ were meant to inspire you to design with pure colour, creating unique compositions or just making a singular bold choice, like a red floor.

Combine Studio Set with Interface carpet tiles side-by-side for an integrated flooring system of hard and soft tiles in Skinny Planks and squares. Interface modular floors allow you to move from surface to surface without the need for transition strips.

And, of course, we design all our products with the ability to feed our recycling program, ReEntry®. We're mindful of our commitment to continually minimize our environmental footprint.

Why Our Modular Resilient LVT?

Integrated System.

Say goodbye to transition strips and doubling up. Our modular resilient floorings are made to work as a system with our modular carpet tile. The compatible size and height of our products allows you to integrate modular carpet for an inset rug or an adjacent field – no transition strip required. You'll avoid doubling up on materials and save cost.

Real Flexibility.

Create a unique look that lasts. Interface modular resilient LVT makes it easy to extend the life of your floor. From simple maintenance like damp mopping to selectively replacing damaged tiles, your flooring investment will stand the test of time - beautifully and effortlessly.

Circular System.

Keep flooring out of the landfill. Our modular resilient LVT is produced with a controlled material stream so it can be reclaimed and recycled into our GlasBac™RE recycled content backing through our ReEntry® program.

Noise Reduction.

Less distractions. With our LVT with Sound Choice™ backing. Offering you best-in-class performance for reduced impact sound and floor to floor sound transmission.

Why Our Modular Resilient LVT?

High Performance from Top to Bottom.

From our Ceramor™ Top Coat to our Sound Choice™ backing, we've designed our modular resilient LVT to provide peak performance in even the most challenging work environment while also providing superior sound absorption.

Abrasion Resistance. Our Ceramor ceramic bead coating provides a durable finish that resists scratching and scuffing so your floors look better longer. Embossing adds texture to further enhance durability.

A Strong Core. Incorporating a fiberglass layer between two core sheets provides optimal dimensional stability and flexibility, allowing for a fully modular installation and the ability to move and update with ease.

Quiet Comfort. (or just "Quiet.") With an IIC rating of 57 our Sound Choice backing provides superior protection against vertical sound transfer. Minimizing noise enhances workplace productivity and creates more usable, comfortable spaces.
