DESIGN YOUR FLOOR!

A

B

C

At Interface Hospitality, we believe nature influences color trends – from the tans and golds found in the sand to the grays and blues seen in the sky. We've expanded the possibilities of our standard Urban Retreat Collection by creating new cool and warm custom color palettes. These products play on the edge, taking motifs that are found on nature's floor to create plush patterns rich in texture, and giving you an endless number of looks, colors and combinations to design your own floor.

D.Y.F.[™]

DESIGN YOUR FLOOR!

Create your own retreat with a customized mix of color and pattern. Work with your rep to find the perfect combination of shades for your design. The key below demonstrates how these particular colors appear in a final product.

UR101[™]

Made of six yarns, UR101 functions as the transition product between two colors. Yarns in positions A, B and C fill the majority of the tile while yarns in positions D, E and F provide the color band.

UR102[™]

The cool or warm tonal variations of the yarn in positions A, B and C make UR102 the go-to product for the base color of your design.

UR103[™]

Use UR103 to fill large areas with color. Yarn A saturates the floor and yarn B provides texture and depth.

Custom Colors - Cool Palettes

These suggested custom color palettes combine UR101, UR102 and UR103 and explore a gradient of neutral tones and saturated accents. Use the whole or parts of the palette, or mix palettes to design a unique space. The gray tones are shared in the four palettes below.

AQUA & ARCTIC PALETTE

INDIGO & ARCTIC PALETTE

CHARTREUSE & ARCTIC PALETTE

CRIMSON & ARCTIC PALETTE

DESIGN IDEAS

Featuring Chartreuse & Arctic palette.

Custom Colors - Warm Palettes

These suggested custom color palettes combine UR101, UR102 and UR103 and explore a gradient of neutral tones and saturated accents. Use the whole or parts of the palette, or mix palettes to design a unique space. Some of the warm tones are shared in the four palettes below while others are specific to a single palette.

WHY MODULAR CARPET TILE?

Flexibility

Keep Your Floor Beautiful. Modular carpet tile allows you to play with pattern and design without having to special order carpet sizes. And the same flexibility that lets you create your floor helps you keep it looking good because in-house staff can easily replace individual tiles that become damaged or heavily soiled—no down time or outside contractors required.

TacTiles®

No Glue Installation. Installation or reconfiguration with our glue-free TacTiles installation system means there's no glue smell and no drying time. Guests can use the room as soon as the last piece is laid and all they'll notice is a beautiful floor.

Intersept®

Mold Protection. No matter what's spilled on the floor, our proprietary preservative, Intersept®, protects our modular carpet against the growth of odor-causing bacteria—guaranteed. With proper maintenance Intersept treated carpet safely and effectively inhibits the growth of mold and other bacteria so your floors are always fresh.

Sustainable Choice

Environmental Responsibility. Interface was the industry's first to earn an EPD (Environmental Product Declaration), which evaluates consistent factors based on full lifecycle assessment (LCA). In addition, all of our products with GlasBac®, GlasBacRE and NexStep® backings meet NSF/ANSI 140 Sustainable Carpet Assessment Standard (SCAS).

Less Waste

Save Money. Interface Hospitality's carpet tile averages just 3.9% installation waste compared to as much as 18% or more with patterned roll carpet. Use our non directional styles with an average of 1.5% waste and save even more. That means more of your flooring investment stays on the floor—not in a dumpster.

Looking for additional comfort under foot?

Ask about our InterComfort™ carpet underlayment.

cool carpet™

Cool Carpet™

Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

Sustainable Carpet Assessment Standard (SCAS)

The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus

An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Environmental Product Declaration (EPD)

A statement of product ingredients and environmental impacts over the entire lifecycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and the LCA must be third party verified.
