Visual Code™ Collection

AI, VR, robotics and smart everything. Hi-tech tools are sleek, enticing and fast, but they can be a distraction from creative thinking. Engagement with the natural world and real, “hi–touch” things like hand-crafted materials and goods, humanize experience, slow it down and restore imagination and wonder.

Visual Code is a collection of ten different patterns inspired by the symbiotic relationship of hi-tech and hi-touch, marrying images of glitch graphics and technicolor circuitry with simple textures that recall plain woven fabrics and rugs.

Based on simple textiles in shades of gray, Stitch Count™, Stitchery™ and Plain Stitch™ set the groundwork for the collection. In contrast, Hard Drive™ and Static Lines™ scramble colors, mimicking a monitor “glitch”. Bright, bold Circuit Board™ is at once precisely like wiring and vaguely like an ancient tribal motif. And finally, striking the balance are four black and white textures that recall handwoven rugs from another time and place.

Each style in Visual Code is made with 100% recycled content nylon, just one of the many steps we take toward creating a climate fit for life. Join the **#climatetakeback** movement.

CoolCarpet™

Intersept®

Production specifications are subject to normal manufacturing tolerances and may be changed without notice. Slight variation in colour among different production lots are normal and should be considered in the overall installation plan. Products covered by manufacturer's written warranty only. All other warranties, including without limitation any implied warranties of merchantability or fitness for particular purpose, are hereby disclaimed. Contact your representative for written warranty information. Recycled content calculations are based on historical averages by total weight of the product for backings. Yarn/Fibre recycled content calculation excludes backing. We update our recycled content information and other environmental data regularly to reflect changes and advancements in our technology.
*Cool Carpet is not a standard option in Australia and New Zealand.

As part of Interface's Mission Zero promise to eliminate any negative impact on the environment by 2020, we always consider the environment impact of every creative, manufacturing and building decision. This sample book is printed on recycled paper and with soy based ink. Twenty four virgin trees were saved from our use of 1725kg of recycled paper in the production of 5000 sample books. Energy intensity also decreased and greenhouse gases were reduced. The other reductions came from waste water and solid waste. Through our sample reclamation program, we help keep sample materials out of landfill by re-using them until it is time to recycle these sample materials.
