DESIGN YOUR FLOOR!

WHOLE EARTH

The distinct, organic patterns of the Whole Earth Collection explore nature's floors from the forest to the prairie and places in between. As 25cm x 1m skinny planks, Whole Earth offers the seamless look of broadloom and makes a great companion for Interface Hospitality's patterned styles.

D.Y.F.™ DESIGN YOUR FLOOR!

LIKE NOTHING ON EARTH

Don't see what you're looking for in the colors we've created? You can easily customize Whole Earth patterns by following the steps below.

1. 

Select a product within the collection.

2. 

Working with your rep select 4 different colors to find the perfect hues for your project. This product was designed using your darkest value colors in the A and B position, with your lightest values in the C and D position. The darkest colors in A and B should be similar in value and color. The lightest colors in C and D should also be similar in value and color.

3. 

When you have colored the pattern, we can produce samples in your palette. Contact your rep for sample orders.

Whole Earth Collection Standard Colors*

Need a quick physical backed tile representation of the Whole Earth patterns? We stock WE151, WE152, WE153 and WE154 in standard colorations for quick delivery. Maybe you need your own unique color combination or a suggested custom color presented in this brochure? Your sales representative can work with you to order exactly what you need. Custom samples have a longer lead time.

WHY MODULAR CARPET TILE?

Flexibility

Keep Your Floor Beautiful. Modular carpet tile allows you to play with pattern and design without having to special order carpet sizes. And the same flexibility that lets you create your floor helps you keep it looking good because in-house staff can easily replace individual tiles that become damaged or heavily soiled—no down time or outside contractors required.

TacTiles®

No Glue Installation. Installation or reconfiguration with our glue-free TacTiles installation system means there's no glue smell and no drying time. Guests can use the room as soon as the last piece is laid and all they'll notice is a beautiful floor.

Intersept®

Mold Protection. No matter what's spilled on the floor, our proprietary preservative, Intersept®, protects our modular carpet against the growth of odor-causing bacteria—guaranteed. With proper maintenance Intersept treated carpet safely and effectively inhibits the growth of mold and other bacteria so your floors are always fresh.

Less Waste

Save Money. Interface Hospitality's carpet tile averages just 3.9% installation waste compared to as much as 18% or more with patterned roll carpet. Use our non directional styles with an average of 1.5% waste and save even more. That means more of your flooring investment stays on the floor—not in a dumpster.

Sustainable Choice

Environmental Responsibility. Interface was the industry's first to earn an EPD (Environmental Product Declaration), which evaluates consistent factors based on full lifecycle assessment (LCA). We now have published EPDs for 99% of our products globally. In addition, all of our products with GlasBac®, GlasBacRE and NexStep® backings meet NSF/ANSI 140 Sustainable Assessment for Carpet.

InterComfort™

Comfort underfoot. Offer guests the additional comfort and acoustical benefits of a cushion underlay with InterComfort, Interface Hospitality's recyclable polyethylene cushion that installs easily with our patented TacTiles® glue-free installation system. There's no sticky mess or potential damage to your subfloor. InterComfort is available in two formats --InterComfort PS for public spaces and InterComfort GR for guest rooms.

Cool Carpet™
Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

Sustainable Assessment for Carpet
The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus
An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Environmental Product Declaration (EPD)
A statement of product ingredients and environmental impacts over the entire lifecycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and the LCA must be third party verified.
