# YOUR SHO

**R FLOORING  
OULD N'T BE.**

From curb to gate, airports don't slow down—and neither can their floors. Security checkpoints, retail corridors, lounges, baggage claim, and back-of-house all ask different things of the same surface. Performance has to keep up with the pace, without adding complexity behind the scenes.

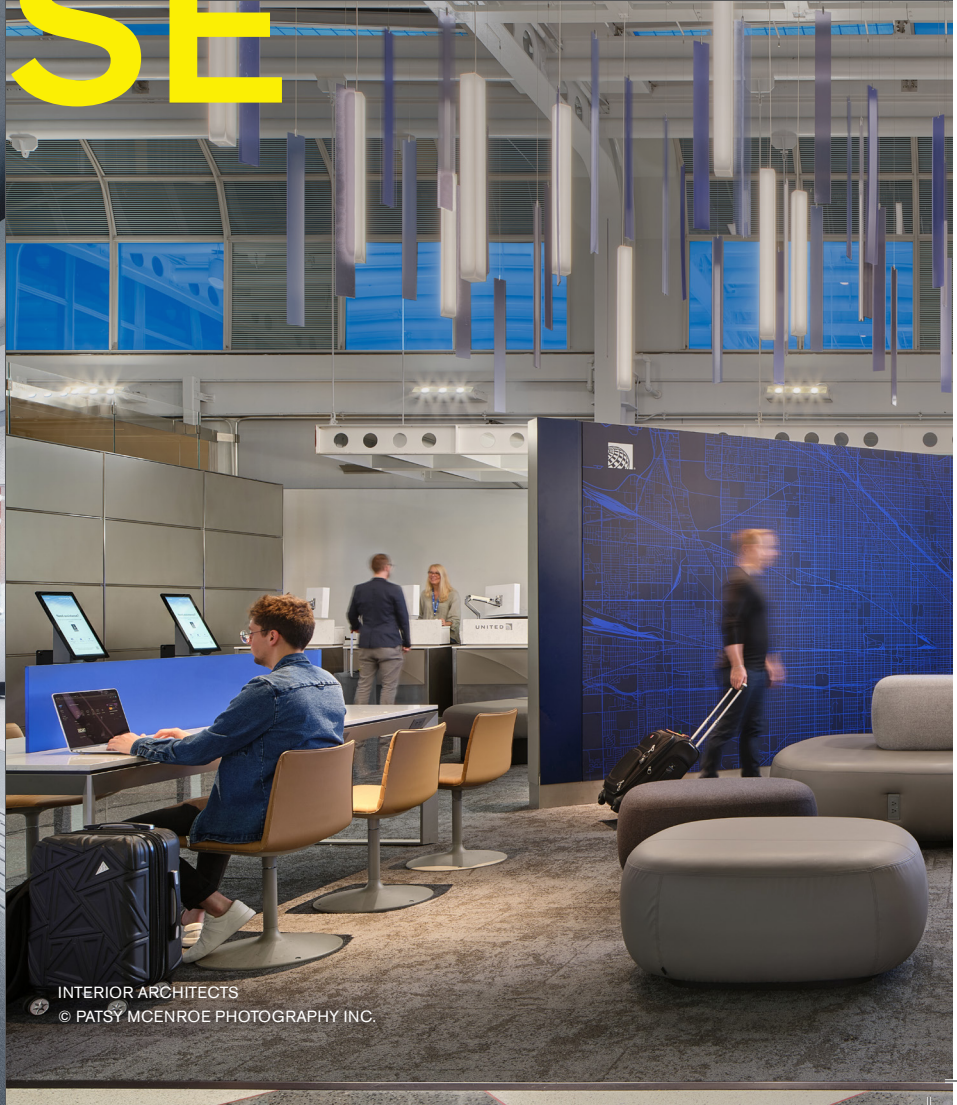

**Interface makes flooring simple, so you can focus on everything else that actually moves.**

# LOCAL SUPPORT

Interface supports airports with projects worldwide, partnering with design teams, operators, and contractors with region-specific expertise and global product consistency.

Our products help you get more from every square meter of your terminal.

## WITH INTERFACE, YOU CAN:

- Specify flooring that keeps pace with millions of steps, carts, and cleanings
- Reduce maintenance closures with surfaces that don't rely on recoatings or frequent replacement
- Design intuitive, welcoming spaces that support wayfinding, comfort, and brand identity
- Lower total cost of ownership through durable, repairable, long-life systems
- Simplify specification with an integrated portfolio that works across every airport zone
- Because when passengers set the pace, your flooring has to keep up.

That's why we're **Made for More™**.

**RELIABILITY** ACROSS  
EVERY TERMINAL ZONE.

**Airports never stop working—and neither should your floors.**

Interface flooring systems are designed to perform across the full range of airport environments, from high-visibility passenger areas to demanding operational zones.

With solutions engineered to work together across zones, you get consistent performance, visual continuity, and fewer compromises from terminal to terminal.

And because sustainability matters at every scale, our ReEntry® recycling program and low-carbon products help reduce waste while supporting long-term infrastructure goals.

# YOUR DESIGN PARTNER

## EASIER PLANNING WITH INTERFACE DESIGN STUDIO

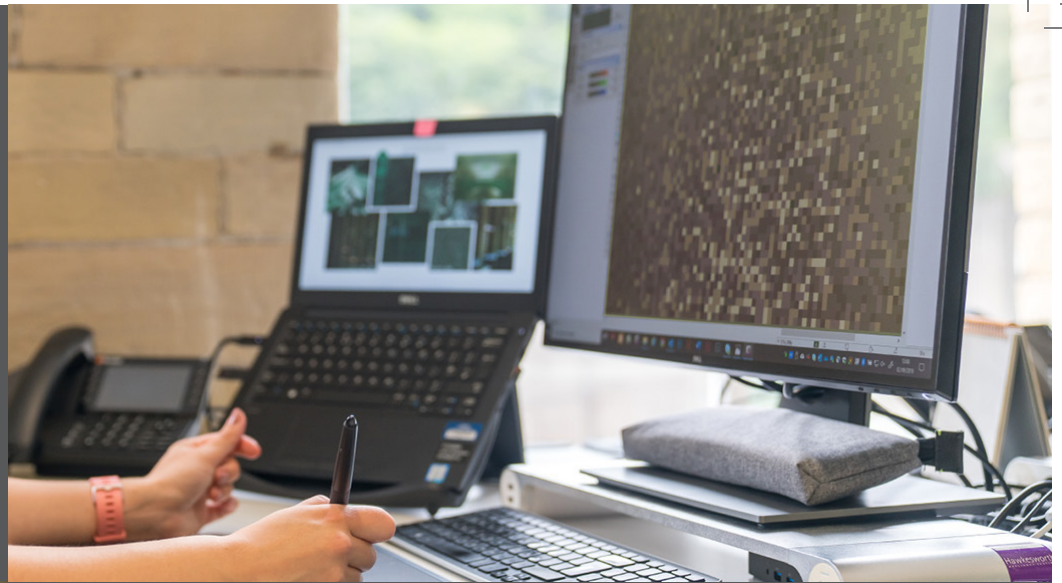

Our experts understand how airport spaces function—and how flooring choices impact operations, safety, and passenger experience. Our complimentary services support your project from early planning through installation.

### We help with:

- Zone-based product selection across terminals and support spaces
- To-scale layouts that support wayfinding and visual flow
- Carbon impact calculations to support sustainability goals
- Phasing strategies that reduce disruption during renovations
- Reshaping or recolouring our products with our custom carpet and nora4you teams

# TECHNICAL SUPPORT

## TECHNICAL SUPPORT, EVERY STEP OF THE JOURNEY

Our specialists work alongside your project teams to ensure correct installation, long-term performance, and maintenance planning—helping you protect your investment and keep traffic moving.

Let's design flooring systems that perform today and adapt for tomorrow.

# HIGH-PERFORMANCE ZONES

## NORA RUBBER

DURABILITY WHERE PEOPLE MOVE

- Built for continuous traffic and heavy rolling loads
- Excellent slip resistance in dry and wet conditions
- Easy to clean with no recoating or polish required
- Long service life supports phased renovation strategies
- Acoustic properties help reduce ambient terminal noise

# CARPET TILE

## COMFORT WHERE PASSENGERS PAUSE

- Improves acoustics in lounges, gates, and waiting areas
- Modular replacement supports fast repairs
- Solution-dyed fibers withstand heavy cleaning cycles
- Flexible design supports wayfinding and zoning strategies

**TOGETHER, THESE SYSTEMS  
ALLOW YOU TO TAILOR  
PERFORMANCE BY SPACE  
WHILE MAINTAINING COHESIVE  
DESIGN ACROSS TERMINALS.**

## 4.5 mm Sound Choice™

- Greater impact sound reduction of 16dB.
- Ceramor+™ coating resists slips, scuffs, and scratches.
- 39% pre-consumer recycled content.
- Recyclable through Resilooop, a vinyl flooring recycling programme in Australia that supports a closed-loop system.
- Designed as a smart system in the same dimensions and height as our carpet tiles, eliminating the need for transition strips.

WE'RE

*'all in'*

ON SOLVING  
THE CLIMATE  
CRISIS

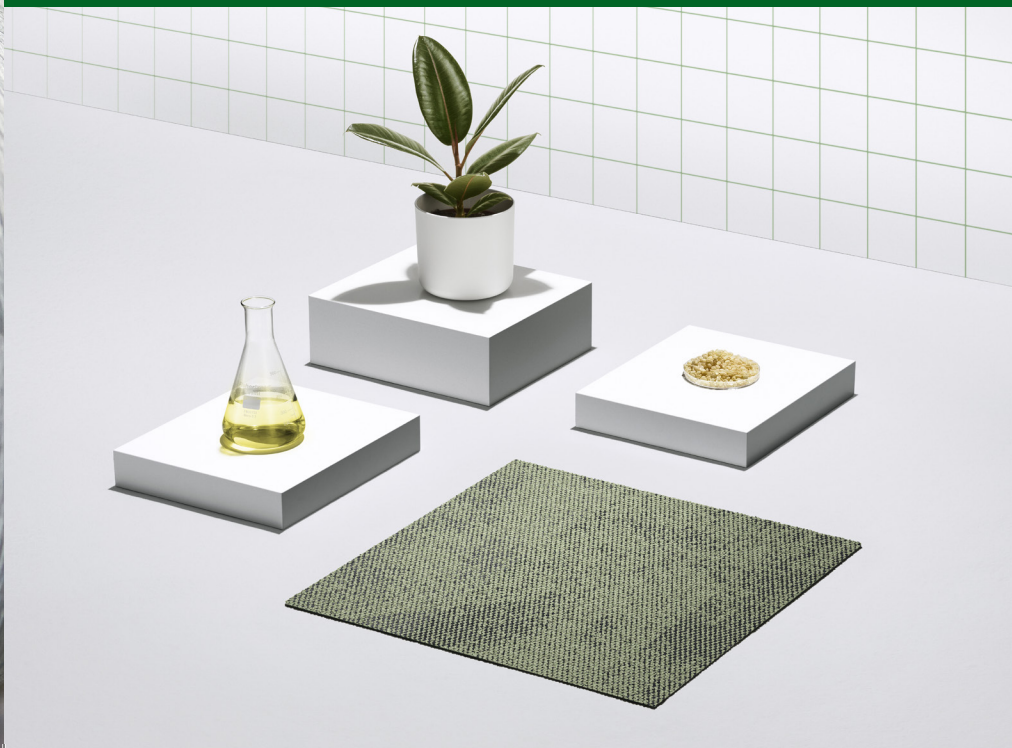

INTERFACE IS COMMITTED TO HELPING REDUCE  
THE ENVIRONMENTAL FOOTPRINT OF TERMINAL  
INTERIORS THROUGH LOW-CARBON MATERIALS  
AND CIRCULAR DESIGN.

Carbon negative carpet tile, which launched in 2020, changed everything for Interface. We now know it's possible to store more carbon than we emit.

So we are challenging ourselves and others to become carbon negative, enterprise wide, without offsets. We've set an incredibly bold and ambitious goal to be carbon negative by 2040, with science based targets set as a 2030 stepping stone on our path.

But our plan is simple. We will continue to avoid, reduce and store as much carbon as we can. And we will inspire others so that we can create a ripple effect for an even bigger positive impact.

*let's plan for a better  
world, together*
