GET CONNECTED

WITH FLOORING FOR EVERY SPACE IN YOUR SCHOOL

Choosing the right flooring for your facility shouldn't be a challenge, so we're making it easy to find just what you need. Our integrated system of modular carpet tile, LVT and nora® rubber offers the best of hard and soft surfaces working together as a system for every space from classrooms to corridors, gymnasiums to offices and everything in between. We've even noted which products are QuickShip to easily identify the best options for quick turnaround projects.

G

YOUR Design Partner

We make finding design solutions easier with Interface Design Studio--expert designers who know Interface products inside and out. And it's complimentary.

From concept to completion, they can work closely with you to create distinct designs that meet your vision and budget, no matter how large or small the project. Plus, the to-scale floor plan layouts can project overall waste and act as an installation guide for the flooring contractor. Just contact your Interface rep to get started.

ASOFTER

HARD SURFACE

Flooring that's so durable it can last for decades—and still look good—is a must-have for any K-12 environment. nora® rubber does just that and more.

- Works together with our carpet tiles and LVT products for a flooring system that performs in virtually any space in a school facility
- Dimensionally stable and installs over most subfloors
- Non-porous, highly dense surface of nora rubber creates a long-lasting floor that cleans easily with little more than water
- Doesn't require coatings and scratches can be remediated
- Highly resistant to chemicals and stains
- nora technical services available for consulting before, during and after installation
- Offers impact sound reduction of up to ΔIIC 21
- Contributes to healthy indoor air quality
- Third-party verified Carbon Neutral Floors™
- nora® nTx floor covering with self-adhesive backing is easily installed as a part of rennovation or new construction, even in areas of high level residual moisture

Fast, when you need it. See nora.com/QuickShip for QS program details.

THE SOFTER SIDE

OF HIGH PERFORMANCE

Our modular carpet is everything you love about soft flooring with the flexibility of tile. We've been perfecting it for more than 40 years.

- Extensive selection of patterns, colors and sizes that work as a system with our LVT and nora® rubber
- Dense construction with premium nylon fibers holds up to heavy traffic
- Solution dyed fibers withstand harsh substances like bleach or han sanitizers
- Structured, dimensionally stable backing system keeps tiles in place and flat on the floor
- Ease of installation and replacement with our glue-free TacTiles installation system
- Intersept[™], our proprietary preservative, is permanently incorporated into the backing to protect carpet tiles against mold growth and odor—even at the seams
- Interface's i2[™] styles have mergeable dye lots that allow for selective replacement, reduce the need for attic stock, and many install nondirectional, reducing installation waste to just 1.5%
- Our CQuest™GB backing offers superior performance with a lower carbon footprint. CQuestGB is made with post-consumer carpet tiles, bio-based additives, and pre-consumer recycled materials, resulting in a carbon negative backing
- Recyclable through our ReEntry[™] program
- Third-party verified Carbon Neutral Floors™

ALL THE EXTRAS

FROM ENTRYWAYS TO STAIRS AND MORE

When we say we have an integrated system of products for EVERY space, we mean That includes walk-off products for entryways, nora® stairwell solutions, and a range accessories for norament® and noraplan® floor coverings to complete the perfect floor

Interface Walk-Off Carps

- Reduce maintenance and add years to the life of your floor
- Stiff fibers in our Step Repeat™ Collection styles grab dirt and debris before
 it's tracked inside
- Interiors stay fresher, creating a better indoor environmer

nora Stairwell Solutions

- Fast installation with decades-long endurance of heavy traffic
- norament® stairtreads offer a pre-shaped stair nosing, riser and trea all-in-one piece
- nora® stair nosings with a slide-in lip for installation on all types of staircases—for use on noraplan /norament floor coverings with a smooth/hammered surface
- nora® visually impaired strips offered in smooth or textured surface, available in different colors

nora Accessories

- nora® wall base to add that final touch to your installation
- Joint sealing when needed with nora® heat weld or nora® cold weld
- High-quality installation materials tailored to nora rubber for safe installation

nora® Flooring Accessories

nora® heat weld

Developed for use with noraplan® flooring, nora® heat welding is recommended when the nora® flooring has been installed in rooms with continual and intensive wet cleaning, in areas with stringent requirements for hygiene or other special requirements, such as operating rooms and laboratories. Due to its resilient structure, welding is required for noraplan acoustic.

nora® cold weld

noraplan and norament[®] floor coverings do not need to be sealed because they do not contain any volatile plasticizers. Thus, there is no shrinkage after installation. In some types of installations, though, it is recommended to seal the joints (seams) in areas with intensive and continual wet cleaning, in labs or areas with specific hygienic requirements for a dense, homogeneous surface.

nora® wall base

Delivering a consistent height and toe dimension you can depend on, nora® wall base exudes a professional appearance that adds that final touch to your installation. If the color you need is not already available, nora wall base has the ability to be custom color matched to any floor, wall, fabric or paint swatch.

nora® Adhesives

nora® dryfix™ 750

nora[®] dryfix[™] 750 adhesive tape provides you with a safe, healthy, cost- and time-effective alternative to conventional flooring adhesives. There is no mixing or adhesive clean-up necessary, and it allows for immediate traffic upon completion of installation.

nora[®] stepfix[™] 240

Specifically developed for norament® stairtreads, nora® stepfix™ 240 adhesive tape makes installing stairtreads quick, clean and easily manageable – making them the optimum solution. With nora stepfix, you can easily dry-fit the tread right on the covered adhesive tape, and stairs can be walked on immediately following installation. On stairs with round nosings, use nora® metal repair stair angle and/or nora® epoxy stair filler to fill the void.

nora® AC 100™

nora® AC 100^{TM} is an easy-to-use, wet set, water based acrylic adhesive that has been specifically formulated for the installation of specific nora rubber floor coverings (2 mm - 4 mm) on absorptive substrates.

Interface

TacTile:

Just peel, pull and stick for a hassle-free, durable carpet tile installation. No mess, no drying time and little, if any, future floor prep. And TacTiles connectors can be recycled with Interface carpet tiles.

Adhesive: XL Brands 2000 Plus (2500 Plus in Canada) for LVT and carpet tile

This releasable, water-based, spread adhesive is available for our carpet tile and LVT and contains our proprietary antimicrobial preservative, Intersept™, for enhanced protection against mold and mildew.

Creating a Healthier Planet-Together

Our goal is to make products with the lowest carbon footprint possible. Through our innovations working with recycled content and bio-based materials, we're making carpet tiles that store carbon, preventing its release into the atmosphere. And the flooring products that we sell, including carpet tile, LVT and nora® rubber, are carbon neutral across their full product life cycle through our third party verified Carbon Neutral Floors™ program. When you purchase our flooring, you're helping create a healthier planet with reduced carbon in our atmosphere.

And with your purchase, we'll give you a Carbon Neutral Floor Certificate acknowledging the amount of carbon offsets you've helped retire from the atmosphere.

Closing the Loop with ReEntry™

Each year we work with collection partners across the North America to divert millions of pounds of used (or post-consumer) carpet from landfills, feeding compatible materials through our Cool Blue™ system to create new flooring over and over again. Most valuable to us is our own LVT and vinyl backed carpet tile. Help us keep closing the loop by including ReEntry as part of your project's waste diversion strategy.
