WE'RE

'all in'

ON SOLVING
THE CLIMATE
CRISIS

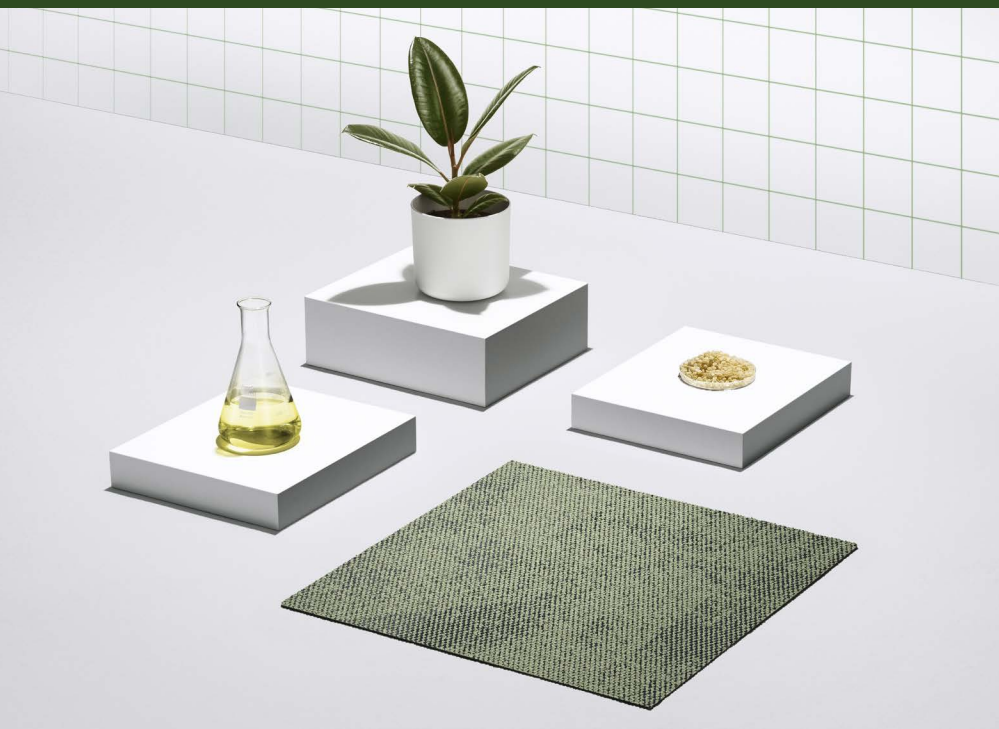

INTERFACE IS COMMITTED TO CREATING HEALTHIER ENVIRONMENTS FOR EDUCATION FACILITIES WHILE MEETING THE URGENCY OF THE CLIMATE CRISIS.

Carbon negative carpet tile, launched in 2020, changed everything for Interface. We now know it's possible to store more carbon than we emit.

So we are challenging ourselves and others to become carbon negative, enterprise-wide, without offsets. We've set an incredibly bold and ambitious goal to be carbon negative by 2040, with science based targets set as a 2030 stepping stone on our path.

But our plan is simple. We will continue to avoid, reduce and store as much carbon as we can. And we will inspire others so that we can create a ripple effect for an even greater positive impact.

*let's plan for a better
world, together*
