

**Leasing Solution
for your Learning
Environments**

St James Catholic Primary School, Victoria, Australia

Why buy when you can lease new flooring? Better for schools. Better for the planet.

EverGreen Lease helps you upgrade your flooring with no initial capital outlay. A holistic solution to navigate budgets with monthly payments. A leasing program that not only offers you flexibility, variety and durability, but also embraces responsible environmental stewardship. You can design the perfect setting to support your students' well being and progress, knowing you're making the responsible choice for the planet.

Why EverGreen Lease?

Cash Flow Friendly

Conserve upfront capital outlay with a flexible financial arrangement of fixed monthly payments from operational expenditure.

Circular System

With our local ReEntry™ recycling program, we create more value from old flooring. We take care of your used carpet tiles and LVT, recycle them into new flooring through ReEntry™ - to ensure that nothing goes landfill, reducing your school's carbon footprint.

Step by Step process:

Step 1

Your Interface Account Manager will work with you on product selection and your design requirements.

Step 2

An Interface accredited contractor will organise your initial estimate.

Step 3

Upon acceptance of initial estimate, Interface will organise a formal quote and initiate the financial approval process.

Step 4

Once approved, Interface will coordinate your school's brand-new flooring installation.

Step 5

At the end of your lease term, you can opt to refurbish your facility again with EverGreen Lease™. Your old flooring will be recycled through our local ReEntry™ program, ensuring that it does not end up in landfill.

Why Interface?

Collaborative Design Solutions

Design inspirations and templates are available to select from for additional support. This is a holistic project management service to help you create impactful learning environments with creative floor design options to suit your unique project needs.

Australian Manufacturing

Interface manufactures locally in Minto, NSW. You can rely on Interface for fast, flexible and tailored service, working with you every step along the way. We're proud to support local communities, making a positive impact on Australian industries and environment by lowering your carbon footprint.

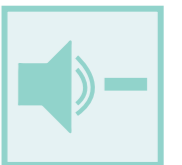

Lowest Carbon Footprint

The flooring products that we sell – carpet tile, luxury vinyl tile (LVT) and nora rubber sheets and tiles – are carbon neutral across their full product life cycle. Interface® Carbon Neutral Floors™ help you lower your carbon footprint with one positive step.

Keeping noise down, and concentration up

Students need to listen, read and think without noisy distractions. We can help you control sound levels through the right choice of flooring. Our modular carpet helps reduce the disruption of poor acoustics, and our CushionBacRE™ backing provides even greater protection and underfoot comfort. You can create spaces for concentration and focus with both hard and soft surfaces. Our LVT comes integrated with superior Sound Choice™ acoustic backing.

Economical in many ways

With modular flooring, the savings start during installation – by saving waste. Interface's non-directional i2® carpet tiles can be installed in any order and orientation. Saving on installation time and achieving nearly 90% less waste than traditional broadloom carpet. You buy less because you throw less away.

And because our flooring is durable and easy to maintain, you see further savings. All our products carry a 20-year warranty – and with proper care and maintenance, your flooring will look great and perform for many years more.

Giving new life to old carpet and LVT with ReEntry™.

Do you know what happens with your used flooring, when you refurbish your space? You could be throwing away more than you think or adding more carbon into the atmosphere without knowing.

With ReEntry, we make updating your flooring easy. We take care of your old carpet and LVT tiles – and saving you a lot of hassle.

We design with purpose. Together we can create a cyclical loop by being responsible for our products at the end of their life and to eliminate our carbon footprint.

We work with alternative options to create social and environmental value from your used carpets. So, whatever happens, you're putting your used carpet to use again. You're helping local communities and the environment by breathing new life into old products, and enhancing your organisation's sustainability credentials at the same time.

ReUse

Used flooring in good condition can be used as flooring again.

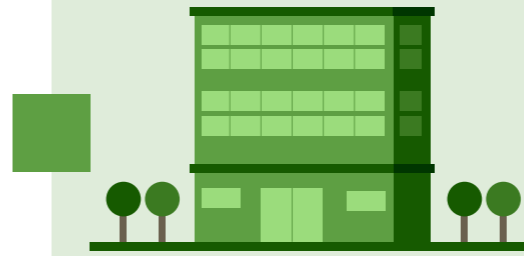

ReCycle

We've developed recycling processes to separate all component materials to be reused into new flooring.

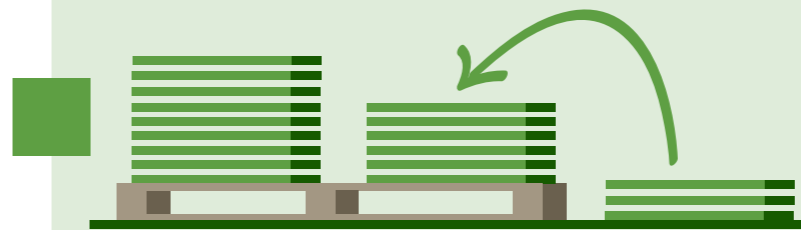

How ReEntry works

Improve your sustainability performance

Site of installation

It's time to update your flooring. Make plans for your new and old Interface flooring.

Interface

Flooring contractor ensures your old carpet tiles and / LVT is dry, free from building debris and contaminants. The used Interface flooring is uplifted and palletised for collection. Contact your Interface Account Manager to book a ReEntry pick up.
