MADE FOR MORE

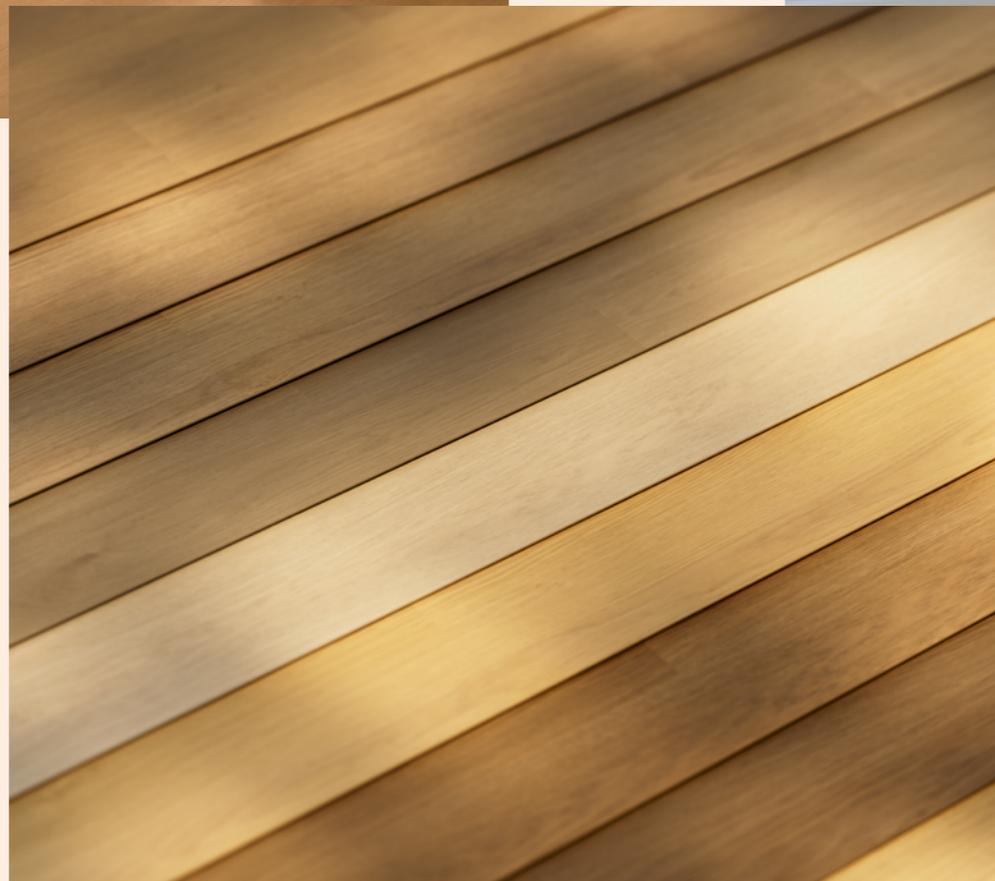

NORAVANT™

RUBBER, REIMAGINED

noravant is the first PVC-free resilient flooring to combine high performance, bold design flexibility, and enhanced sustainability—without compromise.

Engineered to push boundaries, it redefines what's possible in rubber flooring.

SUSTAINABILITY

MADE FOR

INNOVATION

nora® by Interface® is more than flooring. It's over 70 years of German engineering, trusted in many of the world's toughest spaces—from surgical suites to subway systems.

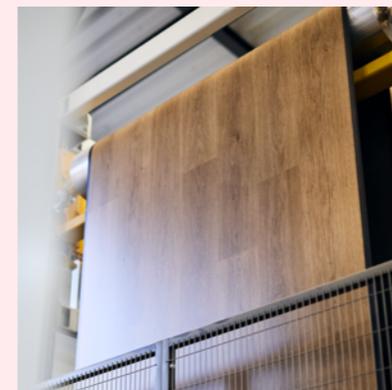

Innovation isn't a feature at nora. It's our whole foundation.

Our in-house labs, material scientists and segment specialists push rubber flooring further every year. The result: solutions that raise performance standards—expanding what designers can do with resilient surfaces.

When we launched noracare in 2020, it was a breakthrough—rubber flooring engineered for increased cleaning and resistance performance and enhanced sustainability. For five years, noracare uno and noracare seneo proved themselves in tough environments. Trusted. Reliable. Setting new benchmarks.

Now, that legacy moves forward. noracare becomes noravant—same performance, new name. And we're innovating again: noravant timber brings woodgrain design to rubber, without compromising the strength and sustainability you trust.

noravant is a standout expression of how our innovation mindset takes shape.

IT'S RUBBER, REIMAGINED

RUBBER, REIMAGINED

WITHOUT COMPROMISE

Featuring an unprecedented blend of benefits never before seen in the resilient flooring industry, noravant is built for superior performance, design flexibility, and enhanced sustainability.

Its secret? Every layer is engineered to work together—and topped with the proprietary surface technology ShieldForm™ for best-in-class chemical and stain resistance, hygiene, and easy care.

PROTECTION, PERFECTED

Unmatched resistance to chemicals, stains, and wear.
Easy to clean. Hygienic by design.

DESIGN, LIMITLESS

New design possibilities — designed to meet creative needs.

INSTALLATION, SIMPLIFIED

No welding required means efficient and reliable installation—without compromising aesthetics or hygiene.

SUSTAINABILITY, STRENGTHENED

PVC-free, low carbon footprint and built to last.
Designed to be recycled at our specialised facility in Germany.

BUILT TO PERFORM

Every layer in noravant serves a purpose. Together, they deliver strength, beauty, and enhanced sustainability, designed to ensure the long-lasting performance you expect from nora rubber.

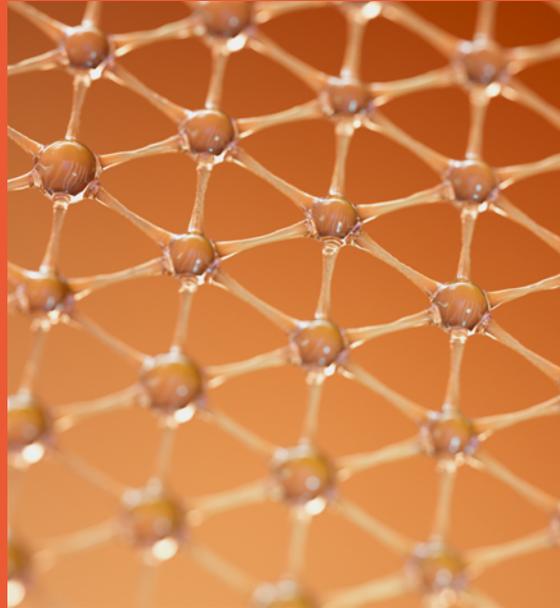

ShieldForm™
Superior resistance to chemicals and stains. Easy to clean.

Wear Layer
Shields the design. Adds resilience.

Design Layer
High-definition visuals.
Maximum design flexibility.

Base Layer
Adds stability, acoustic
and ergonomic comfort.

LAYER BY LAYER

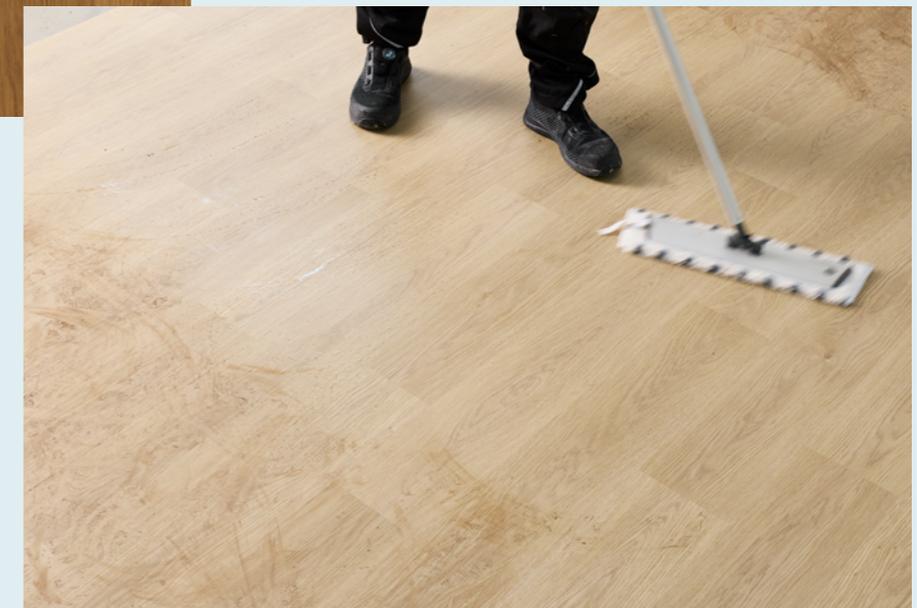

ShieldForm™ is nora's proprietary advanced surface technology—built for performance that lasts. Engineered by the nora rubber experts, it delivers high chemical and stain resistance, effortless cleaning, and long-term durability.

IT'S RUBBER, REIMAGINED FOR PROTECTION

What it delivers:

- **Superior hygienic performance**
Designed to meet strict hygienic standards, with excellent resistance to stains and harsh chemicals.
- **Effortless maintenance**
Engineered for easy care. Dirt lifts easily and cleaning stays simple.
- **Durability that lasts**
Preserves the look and integrity of your floor, no matter how demanding the environment.

SHIELDFORM™

FINISH, PERFECTED

WELD-FREE

SEAMLESS BY DESIGN

Monolithic look—no welds, no visual breaks.

FAST TO INSTALL

Quicker installation, fewer steps, less downtime.

CLEAN LINES CLEAN SPACES

No welds, no dirt traps. Just clean, hygienic flooring.

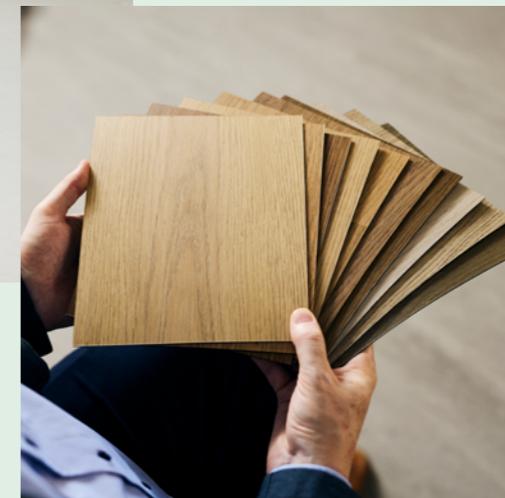

WORRY-FREE

NORAVANT™ TIMBER

noravant timber is tough like oak. Calm like nature. It's high performance with exceptional protection—built to last, designed to soothe. Ten wood-inspired colours. Soft tones.

RUBBER, REIMAGINED

FOR HEALTHCARE

© Elmar Witt

noravant timber combines the warmth of wood with the performance healthcare demands. Its advanced surface technology and weld-free installation make cleaning easier and hygiene stronger. With high chemical resistance and natural aesthetics, it's built to support healing in every space.

RUBBER, REIMAGINED

FOR EDUCATION

© Elmar Witt

noravant timber brings warmth and resilience to learning spaces. It's easy to clean, quiet underfoot, and tough enough for high-traffic zones—supporting healthy, focused environments that last.
