CARPET TILE | LVT | NORA® RUBBER

INTERFACE FLOORING IS

M A D E F O R M O R E

**WHERE DESIGN,
MEETS PERFORMANCE,
MEETS SUSTAINABILITY**

Without compromise, we create a thriving tomorrow for us all. It's about more than flooring—we're setting higher standards for design, performance, and sustainability. We create flooring that looks incredible from day one. And every day after. For decades.

When your project demands answers, you need experts who are close enough to support you and strong enough to deliver. 100+ countries. Local manufacturing. Global ideas moving at local speed. That's Interface.

Our flooring works hard and treads lightly. It's good for us, those we work with, and the planet. Above all, it's good for you.

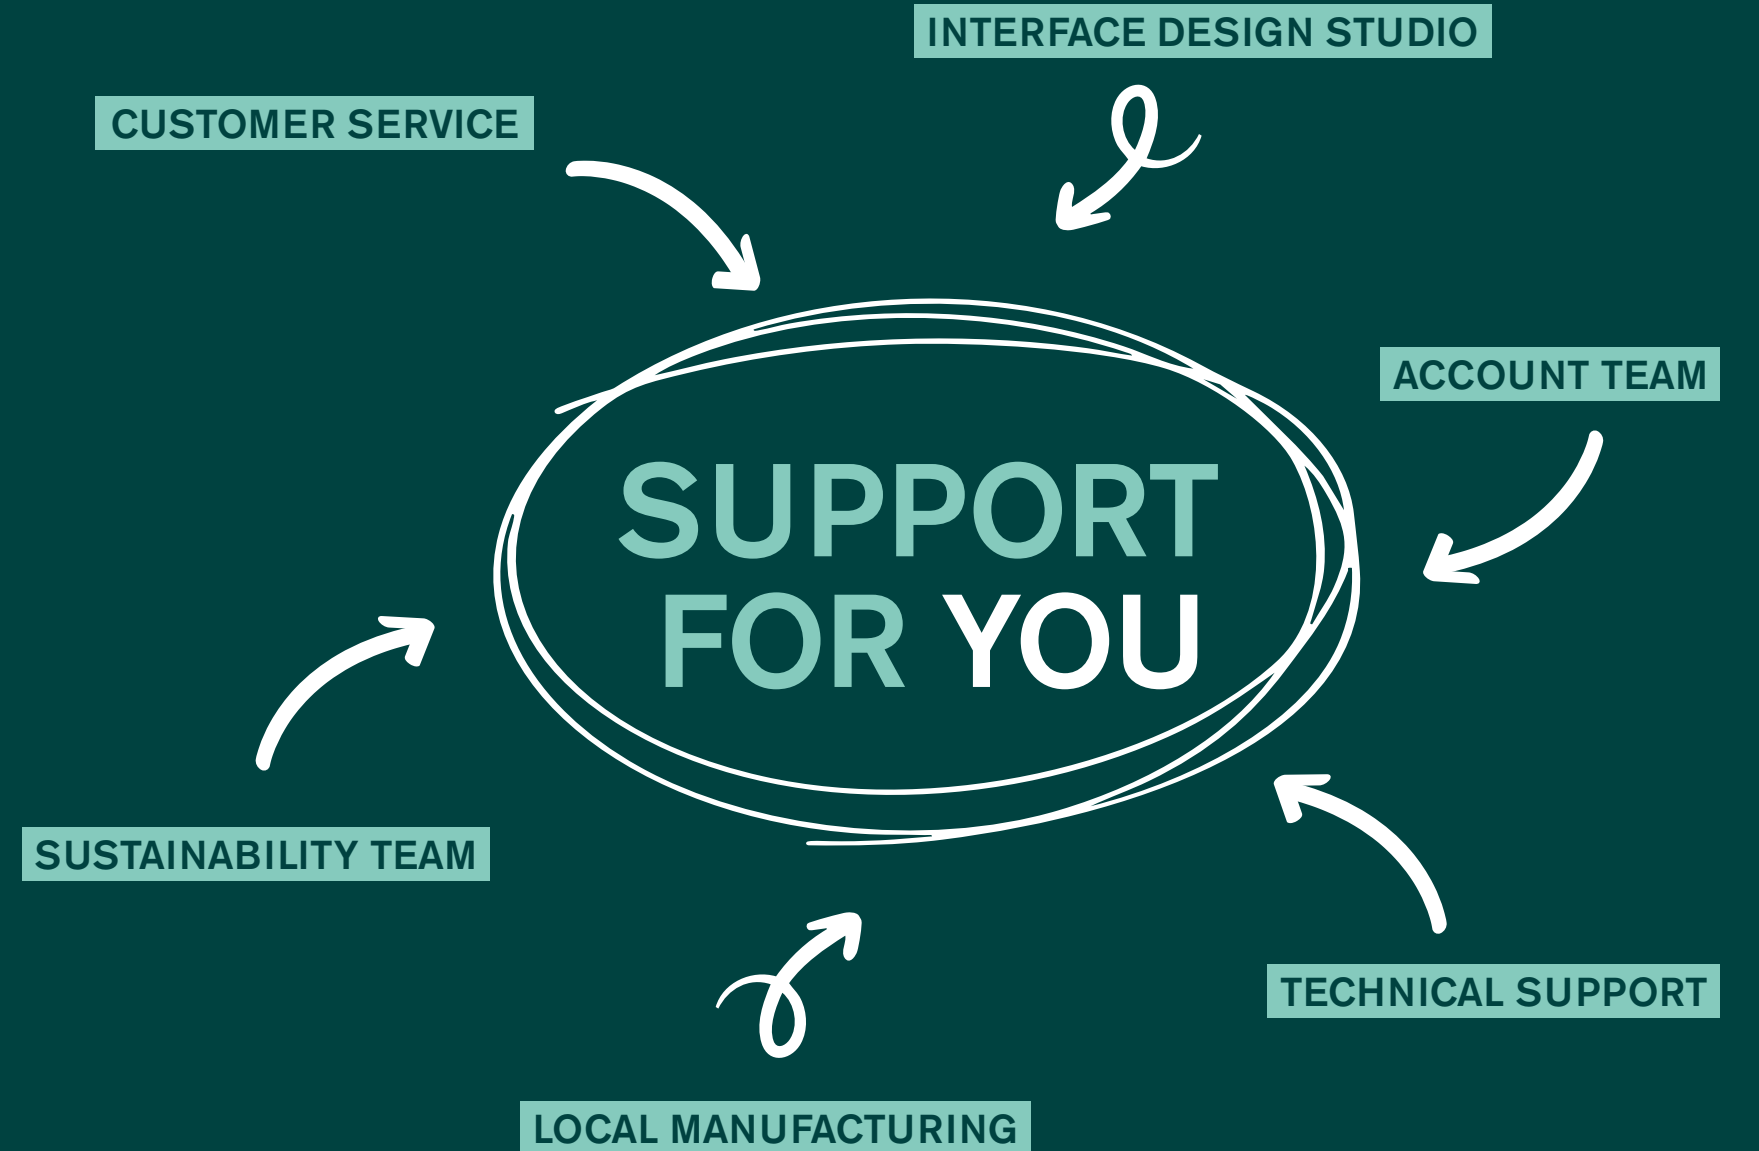

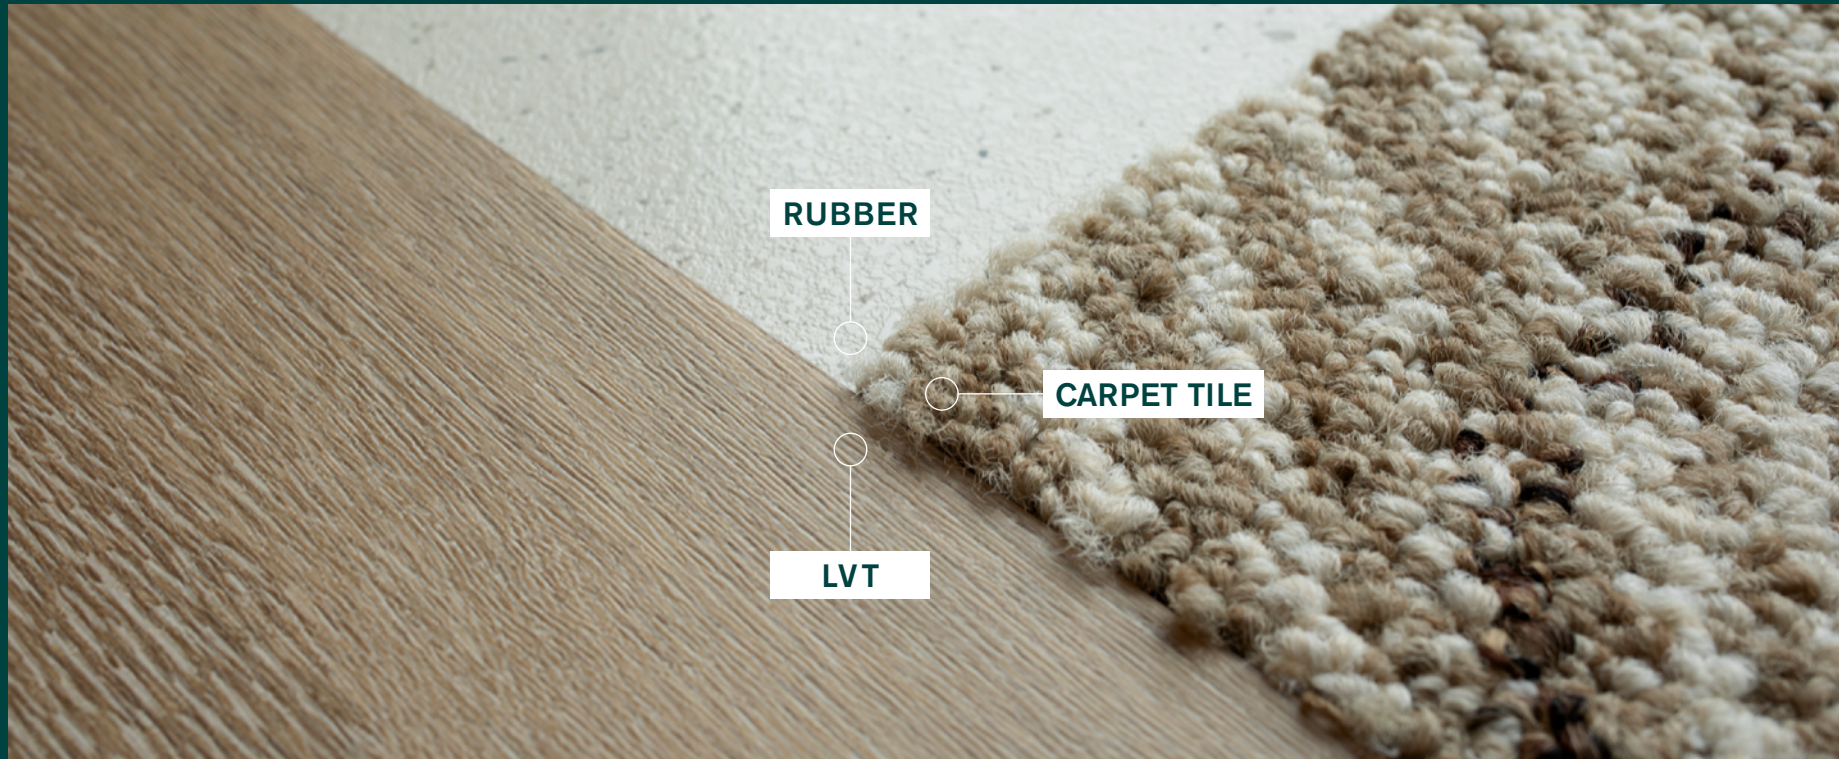

ONE PARTNER ONE SYSTEM

Three modular powerhouses trusted by the world's architects, designers, facilities managers, and contractors. Flooring ready to mix, match, and flex. And ready for whatever life throws at them.

CARPET TILE | Soft, modular planks and tiles for comfort and acoustic performance.

LVT (LUXURY VINYL TILE) | Durable, design-forward vinyl planks and tiles with easy maintenance.

NORA® RUBBER | High-performance rubber flooring for resilience and safety.

PERFORMANCE YOU CAN COUNT ON

Interface flooring works hard and treads lightly. It's good for us, those we work with, and the planet.

From acoustics to indoor air quality, our products are ready to perform and meet the demands of your space.

WE'RE
'all in'
ON CARBON
NEGATIVE
BY 2040

Our plan is simple. We will continue to avoid, reduce and store as much carbon as we can. And we will inspire others so that we can create a ripple effect for an even bigger positive impact.

CIRCULARITY

MEANS OUR FLOORING IS AROUND FOR LONGER

MADE TO LAST

Our products outperform, outlast, and outshine—standing tough and looking good.

BIO-BASED & RECYCLED

Landfill? We designed it out. Because end of life doesn't mean end-of-story. It means a new start.

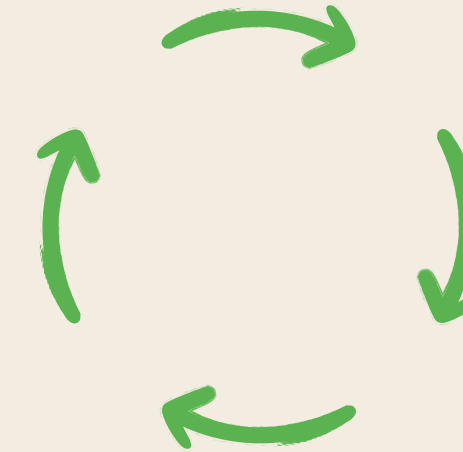

LOWER CARBON FOOTPRINT

Carbon has nowhere to hide. We consider every material, every process, every decision. Relentlessly.

REDUCED WASTE

Modular means replacing only what's needed—not the entire floor. Cutting the impact on the planet, and your budget.

sustainability, it's our mission

WHY JOIN THE REVOLUTION,

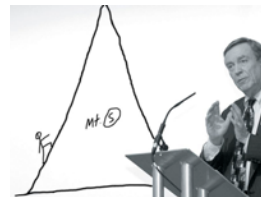

Founder Ray Anderson did just that in 1973, when he brought the concept of modular design and manufacturing to the US flooring market.

His ideas soon spread worldwide—making Interface the global leader in modular flooring.
Talk about a revolution.

The very, very short story...

1973:
Interface founded by Ray Anderson.

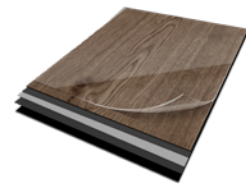

1994:
Ray's "spear-in-the-chest" moment leads to a bold sustainability mission, setting new standards for environmentally responsible manufacturing.

FLOR
by **Interface**

2003:
Consumer brand FLOR is born.

2010:
We partner with Aquafil to create a closed-loop nylon recycling system, sparking industry-wide innovation in sustainable materials.

2017:
Interface expands into resilient flooring with the launch of luxury vinyl tile (LVT), offering more design flexibility.

2019:
Interface achieves ambitious Mission Zero goals, proving sustainability and market success can go hand-in-hand.

nora[®]
by **Interface**

2018:
nora[®] rubber flooring takes hard-wearing resilience to a new level.

2030:
Expected to accomplish science-based sustainability targets.

2040:
Expected to become carbon negative—giving more than we take from the planet.
