ReEntry® Reclamation & Recycling
Program Guidelines – U.S.

What's so right about ReEntry

ReEntry allows us to reclaim the products we've created and use them as food for new ones.

By sending us your post-consumer Interface carpet tile and Sound Choice™ LVT, you lower your environmental footprint and your disposal costs, and make it possible for us to offer you products with increasingly less virgin raw materials.

How It Works

We'll take back all post-consumer Interface carpet tile and LVT products installed with a releasable installation system. This includes Interface carpet tile backed with GlasBac™, GlasBacRE, ReadyBac™, CushionBac Renew™, Graphlar™, Graphlex™, CQuest™GB, CQuestBio, or CQuestBioX, as well as Interface Sound Choice LVT.

We'll pay the freight on FULL TRUCKLOADS of the approved post-consumer Interface products listed above if new Interface flooring is being installed.

A full truckload of carpet tile is 3,200 – 4,400 SY or 30,000 – 42,000 lbs. On average 1 SY of modular carpet equals 9.5 pounds. Full truckload weights may vary for LVT.

If new Interface flooring is being installed, we'll also pay for a drop trailer for full truckloads IF one is available in your location. Trailers must be turned once a month or a $125 weekly fee will apply.

How To Get Started

1. Contact ReEntry at 1.888.733.6873 or via email at reentry@interface.com.
2. Be sure to have the following information:
   - Square yardage or square feet
   - Carpet tile and/or LVT sample
   - Location
3. A ReEntry Reclamation Consultant will guide you through the reclamation process.

Note: Flooring contaminated with asbestos or any other hazardous material from any source, including cutback adhesives and Vinyl Asbestos Tile, cannot be reclaimed. If you are unsure about your job, please test carpet swatches for hazardous material before removal to prevent exposure. For carpet tile installed prior to 2003, please contact ReEntry at the number above.
