MODULAR CARPET

INTERFACE, INC. – AMERICAS
CQUESTTM BIOX
100% RECYCLED CONTENT NYLON 6

CQuest™BioX

Our backing that stores the most carbon. It's the same material make-up as CQuest™Bio with a higher concentration of carbon negative materials.

Interface®

For more than four decades, Interface has consistently led the industry through design and innovation and is a world leader in environmental sustainability. We are committed to transparency and will continue to share our progress as we work to become a carbon negative company by 2040.

At Interface, we believe Life Cycle Assessment is critical for evaluating the environmental impacts of our products. The LCA-based Environmental Product Declaration is the best way to provide full disclosure of those impacts to our customers.

Interface was one of the first companies to develop EPDs for all of our products manufactured globally, and we are committed to providing this level of transparency to our customers, partners and the industry.

For more information visit www.interface.com.

This life cycle assessment was independently verified in accordance with ISO 14044 and the reference PCR by:	Thomas Sprin
	Thomas P. Gloria, Industrial Ecology Consultants

LIMITATIONS

Exclusions: EPDs do not indicate that any environmental or social performance benchmarks are met, and there may be impacts that they do not encompass. LCAs do not typically address the site-specific environmental impacts of raw material extraction, nor are they meant to assess human health toxicity. EPDs can complement but cannot replace tools and certifications that are designed to address these impacts and/or set performance thresholds – e.g. Type 1 certifications, health assessments and declarations, environmental impact assessments, etc.

Accuracy of Results: EPDs regularly rely on estimations of impacts; the level of accuracy in estimation of effect differs for any particular product line and reported impact.

Comparability: EPDs from different programs may not be comparable. Full conformance with a PCR allows EPD comparability only when all stages of a life cycle have been considered. However, variations and deviations are possible". Example of variations: Different LCA software and background LCI datasets may lead to differences results for upstream or downstream of the life cycle stages declared.

Interface®

Interface, Inc. - Americas Modular Carpet on CQuestTMBioX Nylon

According to ISO 14025, EN 15804 and ISO 21930:2017

Modular Carpet on CQuest™BioX
Nvlon

According to ISO 14025, EN 15804 and ISO 21930:2017

1. Product Definition and Information

1.1. Description of Company/Organization

Interface, Inc. is a global flooring company specializing in carbon neutral carpet tile and resilient flooring, including luxury vinyl tile (LVT) and nora® rubber flooring. We help our customers create high-performance interior spaces that support well-being, productivity, and creativity, as well as the sustainability of the planet. Our mission, Climate Take Back™, invites you to join us as we commit to operating in a way that is restorative to the planet and creates a climate fit for life.

1.2. Product Description

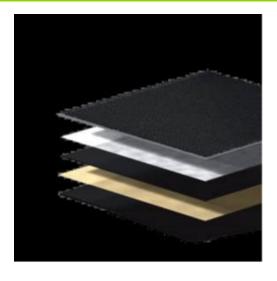

Figure 1 (left): CQuest™ carbon negative backings, layered with: Yarn tufted into the primary backing; a pre-coat; backing compound; stabilizing glass tissue and an additional layer dependent on manufacture location.

Product Identification

Interface's CQuest [™] BioX is non-vinyl backing made with biopolymers and bio-based and recycled fillers which are net carbon negative. This Environmental Product Declaration covers all styles and patterns of modular carpet on CQuest [™] BioX backing with recycled Aquafil Econyl Nylon yarn. The products are manufactured in Troup County, Georgia, USA. The products range in yarn weight from 407 to 814 grams per square meter. A medium yarn weight of 407 grams per square meter is reported and the Global Warming Potential of all additional product yarn weights are reported.

Product Specification

UNSPSC code: 301617 CSI code: 09680

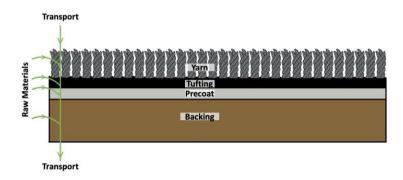

Interface®

Interface, Inc. - Americas Modular Carpet on CQuestTMBioX Nylon

According to ISO 14025, EN 15804 and ISO 21930:2017

Flow Diagram

A1-A3 measured flows include manufacturing processes, transport, and raw material inputs for each product layer and sub-layers.

1.3. Application

Application of product is intended for modular installation of floorcovering in commercial buildings.

1.4. Declaration of Methodological Framework

The data is retrieved from a cradle to grave LCA study. This EPD covers the entire life cycle of the product from cradle to grave (modules A1 to C4) excluding modules for which there are no inputs/outputs. No known flows are deliberately excluded from this EPD. The description of the study boundaries is declared in Section 2.2.

For this product, the stated RSL is 15 years. It should be noted, however, that the service life of carpet tiles may vary depending on the amount and nature of floor traffic and the type and frequency of maintenance. The manufacturer has provided this service life on the basis of its experience of flooring manufacture and supply.

The description of study boundaries is declared in Table 6.

According to ISO 14025, EN 15804 and ISO 21930:2017

1.5. Technical Requirements

Technical Data

Name	Value	Unit
Yarn type	Nylon	
Primary backing type	Polyester	
Secondary backing type	CQuest TM BioX (biobased resin)	
	·	2.5 Moderate, 3.0 Heavy, 3.5
CRI rating	3	Severe
Total thickness	Variable	mm
Product weight*	2800	g/m²
Surface pile thickness*	1.5	mm
Surface pile weight	407	g/m²

^{*} nominal values

1.6. Market Placement / Application Rules

Product considered relevant technical specifications such as ASTM E-648 and ASTM E-662. See Section 6.3 for more info

1.7. Material Composition*

Component	Material	% Mass *
	Nylon	14%
Yarn	Post-consumer recycled nylon	(7% of 14%)
	Pre-consumer recycled nylon	(7% of 14%)
Primary backing	Pre- & post-consumer recycled polyester	4%
Droppet hooking	Vinyl acetate emulsion	6%
Precoat backing	Alumina trihydrate	4%
Stabilization layer	Fiberglass mat	2%
	Bio-based filler	36%
	Bio-ester	14%
Cocondom, booking	Ethylene vinyl acetate	18%
Secondary backing	Bio-based oil	1%
	Pre-consumer recycled limestone	1%
	Polypropylene	2%

^{*} nominal values

Interface®

According to ISO 14025, EN 15804 and ISO 21930:2017

1.8. Manufacturing

CQuest™BioX is manufactured in Troup county, Georgia.

1.9. Packaging

Planks and tiles are packaged in cardboard boxes. Packaging waste should be reused or sent local cardboard recycling facilities.

1.10. Transportation

Delivery is represented as transport by truck over a distance of 500 miles (805 km).

1.11. Product Installation

Product may be installed with pressure sensitive adhesive. For full installation instructions, see the Interface Installation Guide, linked at: https://www.interface.com/US/en-US/about/modular-system/Installation-Instructions.

1.12. Use

Conditions of use: During the life of the carpet, it should be cleaned in accordance with the product warranty instructions including vacuuming and extraction cleaning. The frequency is dependent upon the expected foot traffic and local conditions.

1.13. Reference Service Life and Estimated Building Service Life

Reference service life 15 years, and it is also indicated in Table 3. The Estimated Building Service Life (ESL) is 75 years.

1.14. Reuse, Recycling, and Energy Recovery

The modular aspect of the product allows for easy reuse of the product. The product is intended to be recycled through Interface's ReEntry process.

1.15. Disposal

At end of life the product should be returned to Interface through Interface's ReEntry process by contacting Interface at +1 888-733-6873. Disposal in municipal landfill or commercial incineration facilities is permissible in accordance with local regulations.

2. Life Cycle Assessment Background Information

2.1. Functional or Declared Unit

The functional unit is one square meter of floorcovering.

Interface®

Interface, Inc. - Americas Modular Carpet on CQuestTMBioX Nylon

According to ISO 14025, EN 15804 and ISO 21930:2017

Modular carpet on CQuest™BioX	Value	Unit
Functional unit	1	m ²
Mass*	2.8	kg

^{*}nominal value

2.2. System Boundary

The LCA is for one square meter of flooring. While the warranted service life is 15 years, modules B1, B3, B4, and B5 are not declared, so the maintenance (B4) is represented for one year. The system boundaries include:

- A1 Raw material extraction and processing, and processing of recycled materials
- A2 Transport to the factory
- A3 Manufacturing including materials, packaging, energy, and waste disposal or recycling
- A4 Transport to installation sites (Asia, US, and Europe)
- A5 Installation including ancillary materials required for installation and trim-waste disposal
- Maintenance: Includes the energy for vacuuming, extraction cleaning and the production and transport of cleaning agents. The treatment of the waste-water from extraction cleaning is included. This is for one year of use.
- C2 Transport of waste to local disposal
- C4 Disposal

2.3. Estimates and Assumptions

The datasets for materials upstream from manufacturing are a combination of information from the GaBi database and supplier provided datasets. Inventories were not available for all materials. When unavailable, conservative proxy datasets were chosen based on similarity of material.

2.4. Cut-off Criteria

The cut-off criteria is less than 1% for energy use and less than 1% of total mass per unit process, the sum of which shall not exceed 5% of either energy or mass. If a flow met the cut-off criteria for exclusion, yet was thought to have significant environmental impact, then it was included.

2.5. Data Sources and Quality

The datasets for materials upstream from manufacturing are a combination of information from the GaBi database version 10.5.0.78 in 2021 and supplier provided datasets. The data quality ranges from good to very good. The temporal quality of the data is very good with both the manufacturing specific data and the GaBi background data being from 2020.

2.6. Period Under Review

The data collection and the product described are an average product manufactured in 2020.

2.7. Allocation

Where relevant, the background data incorporates some allocation such as in the power mix. There are no co-products

Interface®

Interface, Inc. - Americas Modular Carpet on CQuest™BioX Nylon

According to ISO 14025, EN 15804 and ISO 21930:2017

produced in the process, so the LCA model does not include allocation. No credits were taken for recycling of production waste.

3. Life Cycle Assessment Scenarios

Table 1. Transport to the building site (A4)

Name	Value	Unit

24 oz.	814 gr.	-0.12

5. LCA Interpretation

The life cycle impacts of modular carpets are driven by the Product Stage and the impacts form this stage are driven by raw materials. Yarns and backing materials are the major contributors to impacts. Recycled polymers in both yarns and backings greatly reduce the impacts as compared to virgin petrochemically based materials previously used in Interface carpet manufacture.

6. Additional Environmental Information

6.1. Environment and Health During Manufacturing

More information on product stewardship can be found on Interface's sustainability website.

6.2. Environment and Health During Installation

All reccomendations shall be utilized as inicated by SDS and installation guidelines.

Interface®

Interface, Inc. - Americas Modular Carpet on CQuestTMBioX Nylon

According to ISO 14025, EN 15804 and ISO 21930:2017

6.3. Extraordinary Effects

Fire

NAME	VALUE
Radiant panel (ASTM E-648)	Class 1
Smoke density (ASTM E-662)	< 450

Water

The product's backing is impervious to water, protecting the subfloor from leaks and spills. Exposure to flooding for long periods may result in damage to the product.

Mechanical Destruction

The product is intended for commercial applications with heavy wear (CRI Test method 101 Appearance Retention Rating). Performance requires proper installation according to Interface installation guidelines.

6.4. Environmental Activities and Certifications

All environmental activites and certifications can be found on Interface's sustainability website.

6.5. Further Information

For more information on the CQUESTTM backings visit <u>Interface's website</u>.
