

Interface®

**ReEntry®**

A new home for your used floor

# ReEntry® a new home for your used floor

Interface takes your used carpet tiles and puts them to good use – by making sure they get reused by small businesses driving the circular approach or charities and community groups to benefits those who really need it. Plus our products are designed to be fully recyclable, to make new carpet tiles for the future. Nothing goes to landfill.

It's part of our commitment to working in a way that's better for the planet and everyone. For over 25 years, our pursuit of sustainability has motivated our every choice. All our products are carbon neutral and, globally, we prevent millions of metres of carpet going to landfill every year.

**When you choose Interface, you're helping to build a healthier planet.**

# Flooring with more to give

**Give your used flooring a second life with our help.**

It might be time to refresh your floor, but that doesn't mean your used carpet tiles don't have more to give. We can take them away and make sure they get reused or recycled the right way.

Keep your used flooring away from landfill and be part of a circular solution.

# Designing for reuse and recycling

The circular economy focuses on designing out pollution and waste. For a manufacturer, this means:

- designing long-lasting products that can be reused;
- using recycled or bio-based materials; and
- making sure products can be recycled.

We used these principles to create CQuest™Bio and CQuest™BioX – new backings that make our carpet tiles durable and long-lasting. Made for reuse, tiles with these backings can enjoy a second life with businesses, charities and other organisations.

The ingredients of a carpet tile with CQuest™Bio backing

## Circular from day one

Circular choices begin at the design stage. For example with CQuest™Bio we are able to increase the amount of recycled and bio-based material of our carpet tiles. These now contain an average of 88% total recycled and bio-based content. A circular approach that further reduces our reliance on virgin oil and reduces the carbon footprint of our products by an average of 33%.

## Reuse and recycle

To close the circle, we recommend reuse – this extends the life of our products while helping the local community and others in need. When reuse isn't a suitable option, our products with CQuest™Bio and CQuest™BioX are also fully recyclable, meaning they can be used to make new carpet tiles for the future.

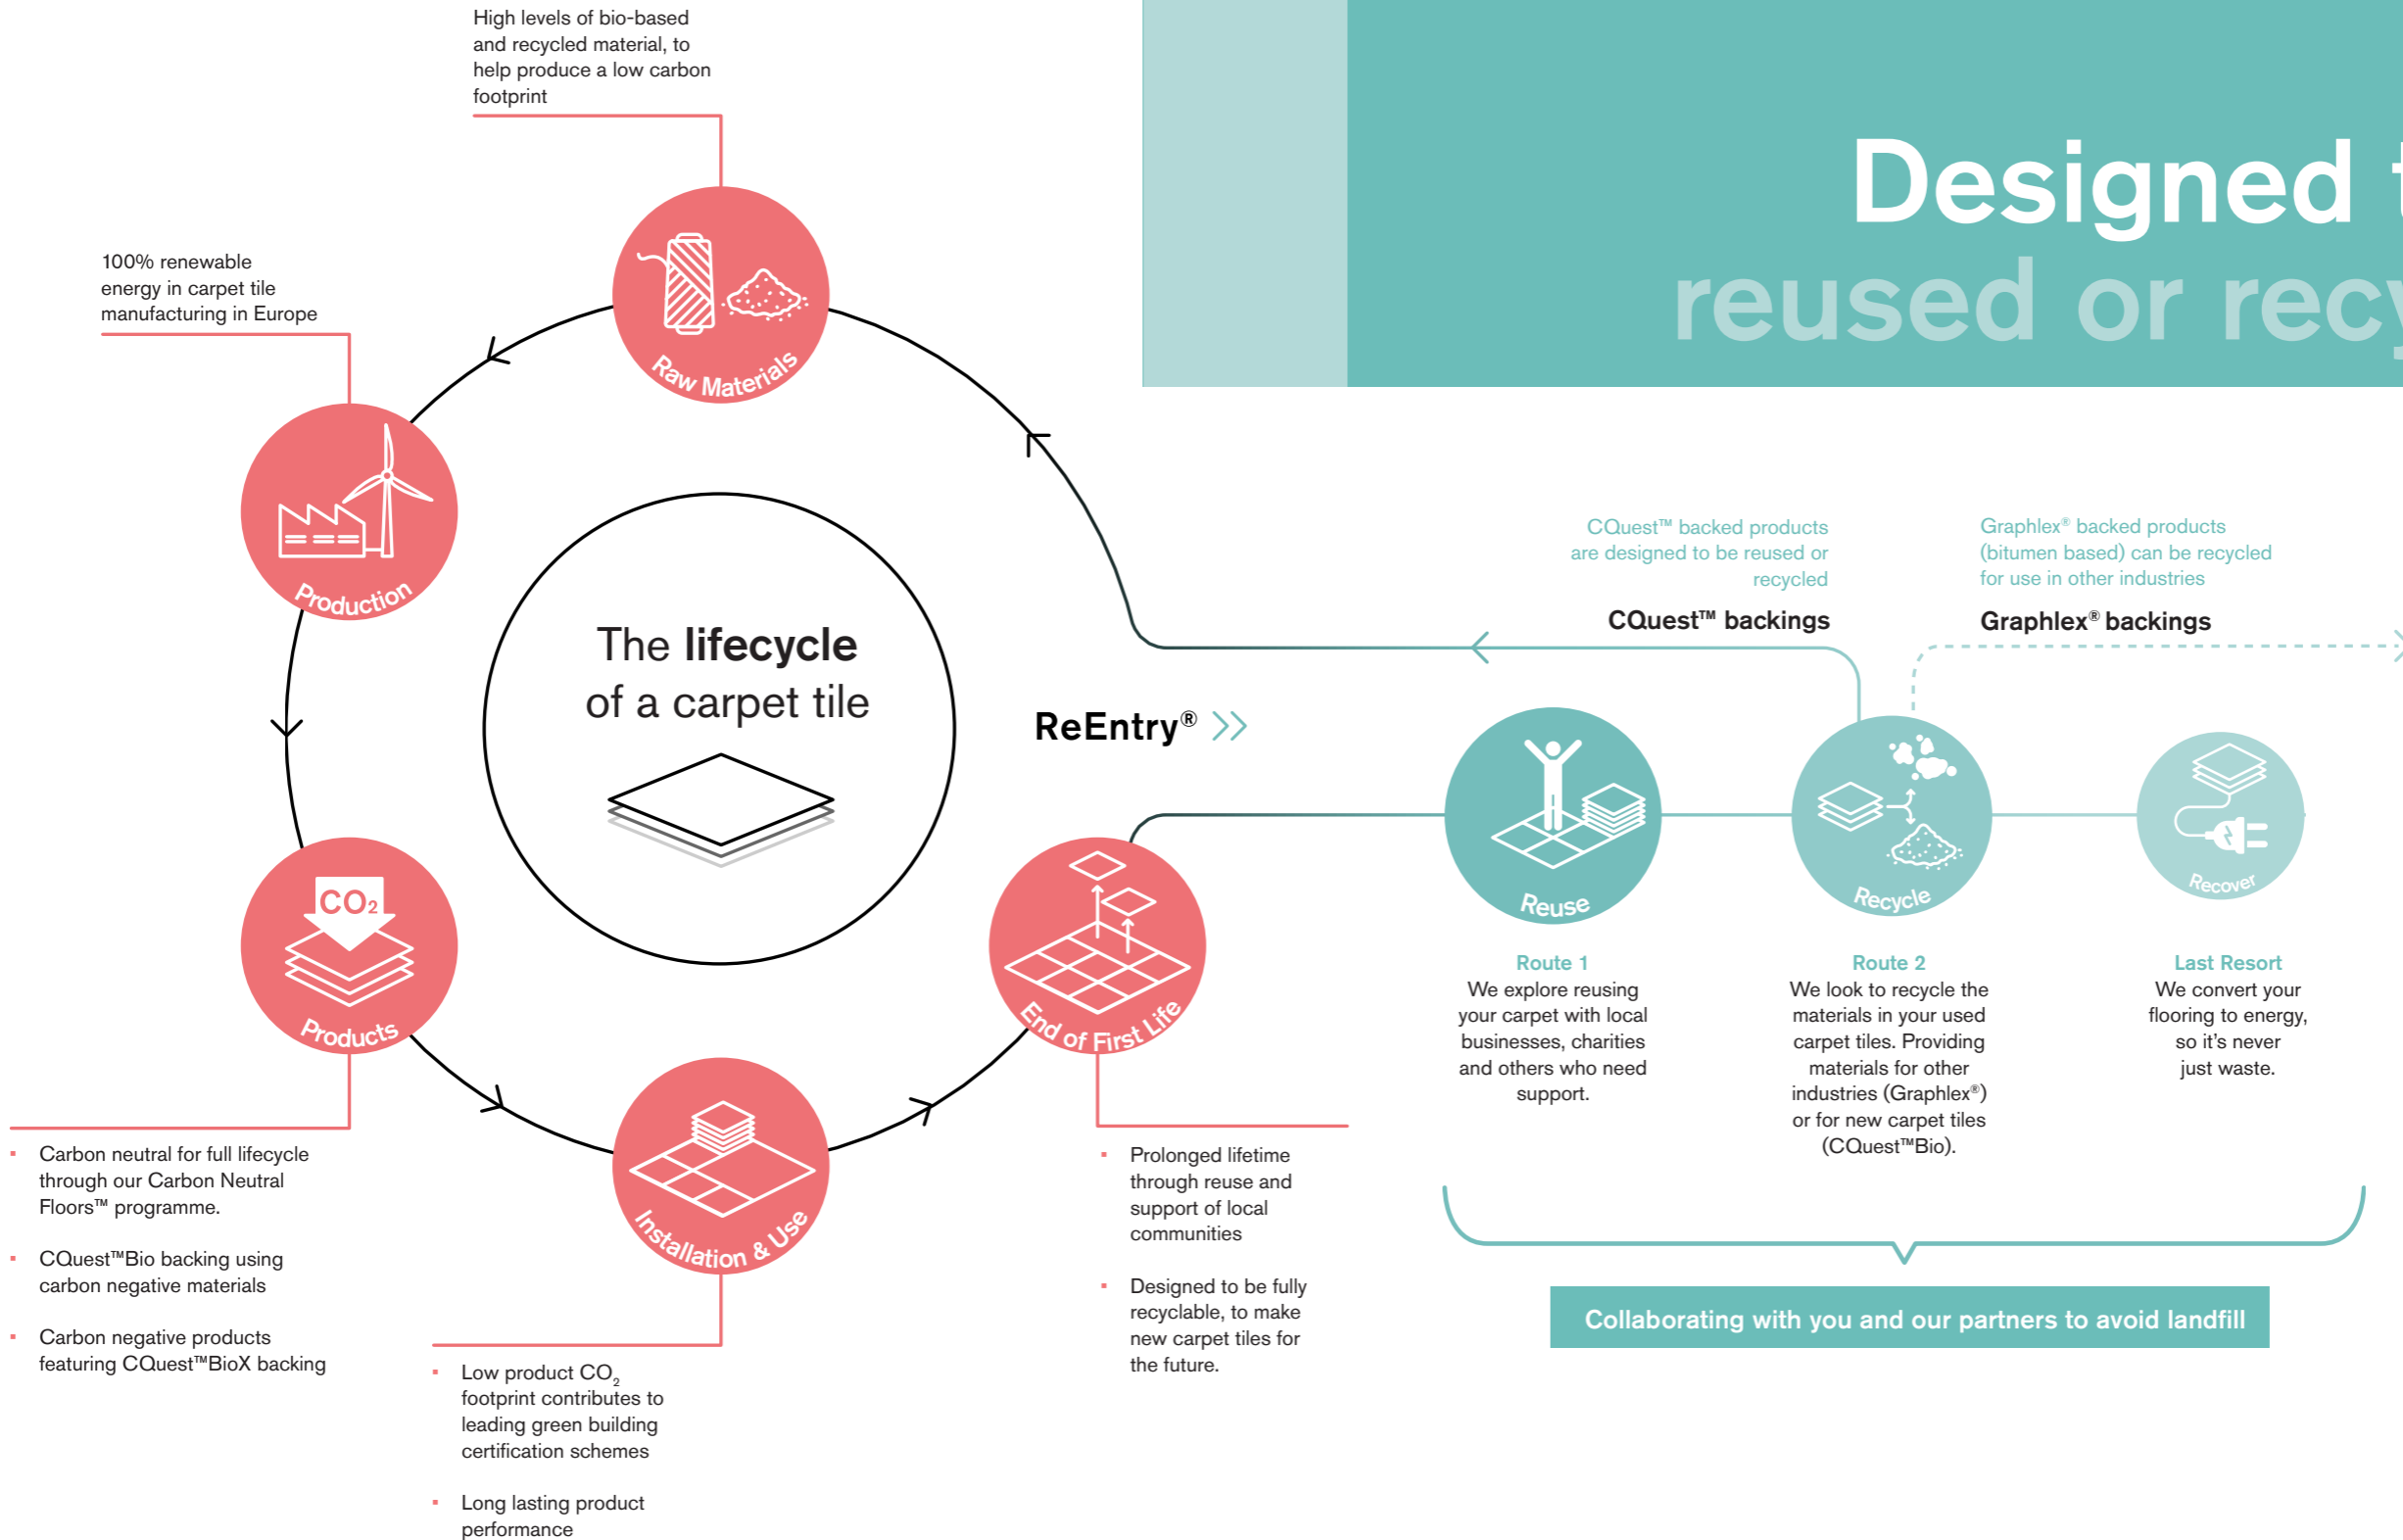

If you have our earlier generation of Graphlex® bitumen backed tiles, we offer reuse, or recycling into something other than new carpet tiles, and even recovery which converts the waste into energy.

No matter what, we make sure your old tiles are never sent to landfill.

## Is your product made for a circular economy?

- Can it be reused?
- Does it contain recycled or bio-based content?
- Is it fully recyclable?

# Designed to be reused or recycled

- Carbon neutral for full lifecycle through our Carbon Neutral Floors™ programme.
- CQuest™Bio backing using carbon negative materials
- Carbon negative products featuring CQuest™BioX backing

- Low product CO<sub>2</sub> footprint contributes to leading green building certification schemes
- Long lasting product performance

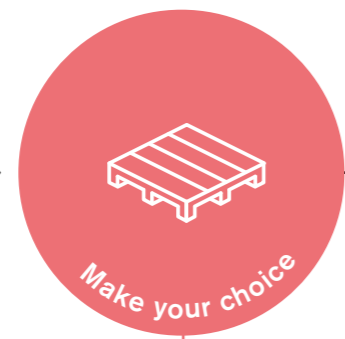

- Prolonged lifetime through reuse and support of local communities
- Designed to be fully recyclable, to make new carpet tiles for the future.

# A new home for your used floor, with no fuss

## How it works

1. We collect your used carpet tiles.
2. Our social enterprise partners find it a new home.
3. We send you a certificate confirming your commitment to reducing waste.

It really is that simple.

Contact your Interface Account Manager or our Customer Service Department to discuss your project requirements.

Agree the date and time for your collection.

We provide you with pallets and materials to prepare the used carpet tiles for take back, or you can use your own material following the specifications.

Our customer service representative will provide you with step-by-step instructions to make it easy for you.

We collect

- Full carpet tiles staged on pallets (+/- 110cm height), protected with corner profiles and wrapped with foil.
- Cut tiles stacked on top of the full pallet and wrapped with foil.

To ensure further processing no other material than carpet tiles will be collected. We accept Euro or Interface pallets.

In order for the tiles to be reused, store pallets in a dry place until pick up.

Following your contribution to the ReEntry® program you will receive a certificate that documents your positive environmental impact.

Our aim is to prolong the lifetime, to avoid long distance transport and to create a social impact. That is why we work with a local network of partners and ReUse is our first choice.

Alternative routes such as recycling, or as a last resort we convert your flooring to energy, so it's never just waste.

# Our Passionate Partners

We work with dedicated and passionate small businesses and social enterprises who specialise in rehoming used carpet. They work mostly with small businesses driving the circular approach as well as charities and community groups - making sure the flooring benefits those who really need it. Plus, they employ and train people in their community – so they make a difference in more ways than one.

Here are some of our partners.

### **Greenstream**

Greenstream ensures your used carpet tiles bring warmth and comfort to a second home. They also provide training and volunteering opportunities with the enterprise being supported financially through the sale of new and used carpet. Several times a year, Greenstream holds donation days for the benefit of the local community.

### **Carpet Tile Recycling**

Carpet Tile Recycling finds second homes for used carpet tiles, with organisations or individuals who want affordable flooring. Some of its customers simply want to buy products that minimise damage to the environment. The company also deals with surplus flooring, again making the most of carpet that would otherwise be thrown away.

Together, with our partners  
we will make sure your used  
carpet tiles have a second life.
