

Carbon Neutral Floors

2021 Offset Projects

Global warming impacts everyone. Interface's Carbon Neutral Floors™ program helps lower your carbon footprint with one positive step.

All the flooring products that we sell – carpet tile, multi-layered resilient flooring and nora® rubber – are carbon neutral across their full lifecycle. To compensate for the full life cycle carbon emissions that we are unable to eliminate, we purchase carbon offsets. In selecting offset projects, Interface sources offsets only from projects that meet third-party verified carbon offset standards such as the Gold Standard (GS), the California Climate Action Reserve (CAR), the American Carbon Standard (ACR), or the Verified Carbon Standard (VCS) with some projects having additional certifications such as the Climate, Community & Biodiversity Standard (CCB).

This assures that the carbon credits we use are real (have happened), additional (beyond business-as-usual activities), measurable and permanent. The quantity and retirement of offsets are verified under our third-party verification for Carbon Neutral Floors on an annual basis.
