# CQUEST™ BIOX. MOVE AWAY FROM THE STATUS QUO.

All our carbon negative products come with CQuest™BioX backing as a standard option.

The carbon negative materials in the CQuest™BioX backing, in combination with speciality yarns and tufting processes, result in a carbon negative carpet tile. The finished product combines durability, industry-leading design, and a negative carbon footprint that ultimately benefits the planet and shows that the pursuits of great design and sustainability are inseparable.

First, we added new bio-based materials and more recycled content to our backings. Then, we measured how these materials influence the carbon footprint. These new materials, measured on a stand-alone basis, are net carbon negative – reducing our carbon footprint and resulting in carbon negative backings.

Learn more about carbon negative backings at [www.interface.com/backings](http://www.interface.com/backings)

# ANOTHER STEPPING STONE ON OUR JOURNEY.

We're constantly working to improve our products' quality and lessen their environmental impact. Increasing the number of products having CQuest™BioX backing available demonstrates we are continuing our journey.

1994

Our founder Ray C. Anderson had a "spear in the chest" moment that kicks off our company's sustainability journey.

1995

Established ReEntry® recycling program, which reclaims carpet to ensure used flooring tiles do not end up in landfills.

1996

Delivered our first sustainability results through the EcoMetrics™ program. Partnered with yarn suppliers to develop recycled nylon, which ultimately is the most significant way to lower the carbon footprint of our products.

1997

Our global sales meeting becomes a sustainability takeover and a moment to commit to sustainability goals, including reducing carbon emissions across the business.

2000

Released our first biomimicry carpet tile, Entropy™, the first Random design approach resulting in less installation cost, waste, and easier maintenance.

2001

Established a new backing system, GlasBac™RE, which included up to 81% total recycled content and served as the initial basis to help us achieve carbon negative backings.

2006

Unveiled TacTiles®, our first glue-free modular flooring installation method, reducing installation time and eliminating glue waste and future floor prep.

2010

Used 100% recycled content nylon on a product by partnering with yarn supplier Aquafil, once again helping us lower the carbon footprint of our products. Using 100% recycled content nylon on a product (versus the old standard of zero recycled content nylon) can reduce its carbon footprint by 20%.

2012

Launched Net-Works™, a program that collects discarded fishing nets for recycling into new yarn, in partnership with the Zoological Society of London. The program brings recycled content into our supply chain in a way that also contributes to ocean health.

2016

Launched Climate Take Back™, our sustainability mission that aims to reverse global warming.

2017

Announced the Proof Positive tile, a first-of-its-kind, carbon negative carpet tile prototype, proving it's possible to make a product with the potential to reverse global warming.

2018

Co-founded materialsCAN (Carbon Action Network) to address embodied carbon.

Developed our first carbon negative carpet tile backing, CircuitBac™Green.

Extended Carbon Neutral Floors™ program to include all products we sell globally – carpet tile, LVT and nora rubber sheets and tiles.

2019

Celebrated Mission Zero® achievement, including 74% reduction in the global average cradle-to-gate carbon footprint of our carpet since its baseline year of 1996.

Additionally, GHG emissions at carpet manufacturing sites are down 96% in intensity and 94% in absolute terms since 1996.

2021

Launched a new range of carbon negative backings and our first ever carbon negative carpet tile products as part of the Embodied Beauty™ collection.

2023

Expanded Carbon Negative product offer for EMEA.

# LESS CARBON IN THE ATMOSPHERE. MORE BEAUTY ON THE FLOOR.

# 38 CARBON NEGATIVE PRODUCTS

All 38 products are carbon negative with CQuest™BioX backing (cradle-to-gate). Products marked **(S)** have CQuest™BioX backing as standard, products marked **(O)** have CQuest™BioX backing as an option. This will be subject to a minimum order quantity.
